FITNESS & SPORT FOR OUTDOORS

For all users, all purposes and all locations

Welcome to KOMPAN, your ultimate destination for outdoor fitness innovation.

You probably already know staying fit and healthy is vital. Regular exercise reduces the risk of chronic diseases, boosts mental well-being and enhances quality of life. But maybe you don't know KOMPAN as a fitness equipment manufacturer.

Here is what we do: We specialise in creating cutting-edge, effective fitness equipment that brings health and wellness to everyone. Our aim is to transform parks and recreational spaces into vibrant, active communities.

So, why KOMPAN? Because we create proven, effective outdoor fitness equipment for all users, all purposes and all locations. And we have done so for many years. For communities, accessible outdoor fitness areas foster a more active population, encourage social connections, lower healthcare costs and build community pride.

With our state-of-the-art equipment, you're promoting exercise and inspiring a healthier, happier community.

Ready. Steady. Go!

EFFECTIVE OUTDOOR FITNESS

For all abilities, all purposes and all locations

We want all users of an outdoor KOMPAN fitness site to feel like they belong. We are all different. That's why we create exercise equipment for people of all abilities. We achieve this in two ways: scalable user positions and adjustable resistance. In other words, no matter who you are, you will be able to use KOMPAN's equipment in a way that optimises your results. Bit by bit. One step at a time.

Whether for health or performance, we know from science that the combination of intensity, duration and type of exerci-

se yields results. It seems evident that exercise equipment must have the functionality to accommodate these demands.

However, this is not always the case for outdoor fitness. And we are changing that. With our high-quality equipment, you can recreate a functional, effective outdoor fitness site, as you know them from indoor training facilities.

The most effective exercise takes place in the moderate- to the high-intensity category. Because people are different, the equipment must be able to offer a wide range of different workloads.

THE SCIENCE OF EXERCISE

Product development based on research

When the outdoor fitness boom started 20 years ago, equipment was at a very primitive stage. We strongly believe that outdoor fitness should provide the same quality of exercise and engagement as we know it from indoor fitness, and we can achieve this by using science and testing.

The KOMPAN Fitness Institute supports our commitment to excellence. With a strong research background, KOMPAN ensures product development is based on the latest health and exercise

science. For us, knowledge and best practices are the foundation of bringing the best fitness solution to your community.

We conduct our own research and collaborate with universities and networks of experts. This ensures that our equipment, whether designed for seniors or athletes of all abilities, is safe and effective. The knowledge and insights gained from science and best practices are directly applied to our product development every step of the way.

The cardiorespiratory effectiveness of the cross trainer is validated with the same test methods that are used to test professional athletes.

The screen shows muscle activity when exercising on the cross trainer. The design of all KOMPAN equipment is being carefully finetuned to give the optimal effect and experience for the user.

FITNESS FOR ALL

Inclusive outdoor fitness

A visit to a KOMPAN play or fitness site offers positive experiences for children and adults of all abilities. So, choosing KOMPAN means investing in a healthier, more connected community for parks and recreational areas. For all types of people.

Our exercise equipment encourages social interaction, physical activity and mental well-being, making your park a vibrant hub for all residents.

With a universal design approach, our solutions cater to the needs of all individuals, ensuring that everyone can enjoy our fitness sites, regardless of their abilities.

We recognise that everyone has individual limits and goals. Our inclusive playgrounds and fitness areas provide engaging and supportive environments to reach and surpass those limits, resetting the bar for individuals of all abilities to advance and grow.

FITNESS AREAS FOR ALL:

Principles for inclusive outdoor fitness:

- Accessibility
- Usability
- Adjustability
- Products having clear colour and design signals
- Multifunctionality (when possible)
- Combining general and specific functionality

USABLE FOR ALL

The multilevel activities of the fitness products make them usable for all.

INCLUSIVE OUTDOOR FITNESS

Download the white papers on inclusive design research and recommendations for fitness sites from our webpage: www.kompanfitness.com

When on a KOMPAN fitness site, the app shows the user how to use the equipment and get an efficient workout. This is a great guide for the inexperienced user.

Personal digital
trainer

KOMPAN Fit app
Available for download in
App Store or Google Play.

RESPONSIBLE WORKOUTS

A guide to performing exercises correctly – and much more!

Encouraging outdoor activity goes beyond installing fitness equipment in a park or recreational area. Inspiring, educating and motivating people to visit and use the fitness site is essential. The KOMPAN Fit app offers a range of tools to help the residents in your area work up a sweat, build strength and stay motivated anytime, anywhere. The app is

free and serves as a digital personal trainer ensuring users are guided in their workouts and exercises.

The best thing: The solution is just a click away on a smartphone and connects users with your KOMPAN fitness site.

SUPER GYM M

SOL202501

The Super Gym M package combines the very compact Super Combi 1 with an sit up bench, a lower back bench, a Cross Trainer, and a bike.

Both pieces of cardio come with adjustable resistance. Regardless of skill level, everybody can easily get an all-round workout on this site.

SUPER GYM XL SUPERVISED

SOL202901

The Super Gym XL Supervised has the same great features as the standard Super Gym XL but also includes a barbell rack, a boxing back connector, and a battle rope connector.

This package is intended only for supervised or gated areas such as sports or fitness clubs, as some of the included items do not satisfy safety standards for public places.

SUPER GYM L

SOL202701

The Super Gym L is based on the Super Combi 3, which provides 360-degree activities in a square structure. It has a built-in challenge where you can move from the overhead ladder through the Turbo wheels and end in the snake bar. In addition to this, it has a low bar, incline press, target shoot, climbing ropes,

rings, and jumping platforms. It is a very engaging outdoor gym with a compact footprint compared to the number of included activities. It can be used for school PE classes, group training, and many other types of structured workouts.

QUICK FITNESS M

SOL202101

On the Road to Being Active. This is a compact fitness site ideal for truck stops or similar. It has all the things you need to compensate for long hours behind

the wheel; cardio, abs, lower back and plenty of strength and stretching opportunities. This site easily fits into small locations near highway parking.

CIRCUIT 6

SOL200501

High-quality Training in a Small Circle. This space-efficient circuit training area with high-end cardio and strength equipment makes training attractive to a broad user group and those not already

fit. The site is perfect for small communities and parks. Circuit training is both effective and very popular, so a site like this will greatly benefit any small community or park.

ACTIVE AGERS S

SOL200101

Accessible fitness for seniors. The package Active Agers S is a compact solution perfect for senior citizens. Equipped with cardio machines and Stay Fit

equipment designed to prevent falls and improve balance and mobility, this site is ideal for senior living communities and health centres.

CIRCUIT 10

SOL200301

Take your Indoor Circuit Outdoors. Circuit 10 is a compact and efficient circuit training area with cardio and strength equipment. This outdoor circuit includes some of the most popular indoor cardio

and strength machines; the timer makes it perfect for interval training. The site is ideal for communities and parks.

ACTIVE AGERS XL

SOL200201

The best you can do for senior citizens. The Active Agers XL site is the perfect space for senior citizens. It has cardio machines and Stay Fit equipment designed to prevent falls and improve

balance and mobility. Furthermore, the site has strength machines perfect for maintaining muscle mass. The site is fitted within a circular walking path and is ideal for senior living communities.

COMMUNITY S

SOL200601

Cardio Attracts More People. The compact Community S is the perfect space for youth and training in small groups. Its different street workout and cardio equipment make it optimal for

bodyweight exercises, such as pull-ups and push-ups, and cardio training. The small space is great for housing, city spaces and parks.

COMMUNITY L

SOL200801

A very Attractive Space. The Community L is the perfect place for medium-sized group training. It is filled with different equipment, from Street Workout to Cross Training and Cardio equipment. It is the optimal space for bodyweight

exercises, such as pull-ups, push-ups, and an added focus on lower back exercises and cardio training. The site fits perfectly into housing areas, city spaces, and parks.

COMMUNITY M PREMIUM

SOL201301

The best from indoors now outdoors. This site is a high-end outdoor replacement for the traditional indoor fitness centre. The site includes a cross-trainer

and bike with adjustable resistance. Strength training for the whole body plus steps and functional training. All in a beautiful and compact setting.

COMMUNITY L PREMIUM

SOL200901

Simply the Best Site. This is a great example of an indoor fitness center recreated outdoors. You have KOMPAN's innovative strength training equipment and cardio equipment combined with various items for functional training. The

highly popular Suspension Trainer and Magnetic Bells make the site appealing even seen from far away. This compact fitness area only needs the space of half a basket court and accommodates beginners just as much as the very fit.

COMMUNITY XL

SOL201101

Impressive Design with Lots of Fun. A site with a strong focus on fun and functional training. The many exercise options in the Cross Training frames make training effective and engaging. The

obstacle course provides a perfect blend of cardio, agility, and excitement: A very motivating space for group training and social exercise.

INCLUSIVE XL

SOL201501

The Most Inclusive Outdoor Fitness Site. The Inclusive XL is a gold-standard example of how inclusive outdoor fitness can be realised. This site offers opportunities for everyone, regardless of skills or disabilities. There are lots of spots for people using wheelchairs, people

with poor eyesight, or people with poor balance and walking capabilities. The keywords here are diversity, adjustable resistance, supporting rails, and friendly design with simple, intuitive use of equipment.

INCLUSIVE L

SOL201401

Invite People with Disabilities. Inclusiveness is about having something for everybody. On this site, every second exercise station is directly usable from a wheelchair position. This means that

people dependent on a mobility device can train together with able-bodied persons - either as individual or group-based circuit training.

STREET M

SOL201901

When Bodyweight Exercises become Fun. Street M is a compact fitness site with over 70 fun and effective bodyweight exercises. The lower back and sit-up bench provide safe and controlled core training. This site also contains many variations for an upper body

workout; even pull-ups don't need to be hard when using the pull-up station or the parallel bars, which are also perfect for stretching exercises. Do your leg training on the two-step benches for strength or cardio training.

OBSTACLE COURSE S

SOL201601

Just Follow the Track. This site is a compact obstacle course that, despite its size, still has a lot of engaging challenges. It involves crawling, jumping,

swinging, climbing and running, and each obstacle allows individual callisthenics training. This site is the perfect choice for schools and sports clubs.

WOOD S

SOL202301

Close To Nature. Wooden fitness equipment made from Robinia is becoming increasingly popular. With the parallel bars and the combi 2 item, more than 40 exercises are available on this site,

and a balance beam is always a magnet to anyone - young or old. This site fits in beautifully with natural or urban surroundings.

OBSTACLE COURSE M

SOL201701

Three Rounds and you are done. An obstacle course long enough to make each round a training session in itself. It has eight challenging obstacles that can also be used as exercise stations individually.

At this course, you can run, jump, crawl, and climb your way through. This site is perfect for schools, sports clubs, universities, and the military.

WOOD M

SOL202201

More than 70 exercises. With the Wood M, you have many opportunities for bodyweight exercises with an emphasis on easy and challenging alternatives. The low pull-up bars and the push-up bars at differing heights are examples of easy starting points. There is no limit to

what you can do on this compact and versatile outdoor fitness site if you are already fit. And the obvious characteristic of this site: all items are based on durable and sustainable wooden Robinia structures.

FROM SKETCH TO FINAL SOLUTION

Collaborate with KOMPAN Design Studio to create a bespoke fitness solution sympathetic to the surroundings.

Imagine a fitness area encouraging healthy lifestyles or a park becoming the heart of a community: your dreams can become a reality. As a landscape architect, you understand that the right outdoor environment can transform a space. We share your vision and are

committed to creating innovative, durable outdoor solutions that captivate and invite users to engage. With the creative minds from the KOMPAN Design Studio, you can develop solutions that give life to the landscape without compromising aesthetics or the specific environment.

GLOBAL CASES

In this section of our catalogue, we bring you a collection of case studies from across the globe. These global examples provide a glimpse into possible and practical insights and inspiration for your own parks and recreational areas. Learn how innovative design, strategic placement and community engagement have turned ordinary spaces into extraordinary hubs of activity and wellness. Inspired by these outdoor fitness sites, which range from large to small, urban to rural, and municipalities to private institutions, you can create your own success story.

KOMPAN

Let's move

The Super Combi 3 has a built-in challenge where you can move from the overhead ladder through the Turbo wheels and end in the snake bar. In addition to this, it has a low bar, incline press, target shooting, climbing ropes, rings and jumping platforms.

Placed close to the Faculty of Health Sciences, the multifunctional Super Combi 3 integrates well with university research projects and physical activity teaching for children and youth.

THE ATHLETICS EXPLORATORIUM SDU, DENMARK

CASE STUDY: According to the International Olympic Committee, the University of Southern Denmark has the best outdoor athletic stadium in the world.

The Athletics Exploratorium at SDU was created in 2013 by Landscape Architects Keingart in close collaboration with experts from the university, including Morten Zachø (KOMPAN Fitness Institute).

This ground-breaking site encompasses an optimal and inspiring environment for organised fitness programmes, free play

and movement. Part of the initial installation comprised the first Street Workout products from KOMPAN.

In 2024, the old Street Workout installation has been replaced with the newly developed Super Combi 3.

CASE HIGHLIGHTS

The Super Combi 3 is based on 360-degree activities in a square structure. This package is a very engaging outdoor gym with a compact footprint compared to the number of included activities. This package is ideal for schools and most types of public areas.

The innovative stadium won the IOC IAKS Architecture gold medal in 2015.

LA PINEDA VILA-SECA, SPAIN

CASE STUDY: KOMPAN Spain with Vila-Seca City Council designed four sports areas and a playground to promote family tourism.

■ ■ ■ This project focused on redeveloping the La Pineda area 5 km from the historic city centre. La Pineda has a long seafront promenade of more than 2,400 meters, one of Costa Dorada's largest urban public spaces.

The objective of the La Pineda project was to invigorate the promenade to boost family tourism through sports and by taking advantage of the natural and maritime environment that the area

already has. To further invigorate the area, access has been facilitated for citizens to arrive by bicycle or on foot and enjoy all the sports and play areas created.

The space design is inspired by marine animals found in the Mediterranean and along the Tarragona coast, as well as mosaics from the Roman villa of La Pineda.

Located at the seafront promenade's edge is an area with functional training. The main fitness equipment in this area is a combination of strength and cross training.

The promenade stretch comprises five activity zones that offer adjustable training methodology, from easier to more challenging and low to high coordination complexity.

You will also find a workout pentagon set, dip bench equipment, two bars at various levels for push-up exercises, three parallel bars, a set of four steps at different heights and a bike rack.

ADJUSTABLE WEIGHTS AND SEATS

The outdoor strength machines' adjustable weights and seats make them easy to use, mimicking techniques familiar from indoor fitness. The handles accommodate different heights, and each machine has a sign explaining how to use it.

BORÅS MUNICIPALITY KYPEGÅRDEN, SWEDEN

CASE STUDY: The outdoor gym at Kypegården in Borås, Sweden, caters to diverse users, from the young to the elderly.

■ ■ ■ The equipment is designed to be safe and comfortable, even for those with visual or physical impairments, ensuring an inclusive fitness experience for all.

The site offers an effective full-body workout, with seven machines covering all major muscle groups. The pull-down, chest press, horizontal row and shoulder

press provide comprehensive upper-body exercises. The leg press targets the large muscles in the lower body, while the sit-up and lower back bench engage the core and back. Together, these machines offer a workout similar to indoor fitness, with the added benefits of sunlight and fresh air.

The Municipality of Borås wanted to harmonise the activity site with its natural surroundings, choosing a green-coloured steel.

This blend of functionality and aesthetics enhances the park's look and attracts more visitors, encouraging them to engage in physical activity in a beautiful, natural setting.

On the site is easy-to-use, adjustable outdoor strength equipment. These strength machines work with the same biomechanics and resistance mechanisms as indoor selectorised strength machines.

An adjustable and interactive piece of cardio equipment which is the same quality and as equally effective as what you expect from equipment in an indoor fitness centre.

BOSJES VAN PEX DEN HAAG, NETHERLANDS

CASE STUDY: The fitness area in Den Haag showcases the power of community involvement and collaboration.

Two elderly residents, passionate about their neighbourhood, frequently visited the park and observed many people engaging in outdoor sports. They envisioned a free-to-use fitness site accessible to everyone.

Motivated by their idea, they approached the local municipality for support and funding. Recognising the value of the proposal, the city backed the initiative. With KOMPAN's expertise and support, a new fitness area emerged.

This site highlights the positive impact of community collaboration and is an inspiring example of how a shared vision can bring about meaningful change. The fitness area at Bosjes van Pex now promotes health and well-being for all residents.

CASE HIGHLIGHTS

This fitness area in beautiful surroundings features various cardio and strength equipment that caters to all fitness levels.

CASE HIGHLIGHTS

Combining play and fitness enables parents and caregivers to be active while spending time with their children. Exercising outdoors provides physical and mental health benefits from exercising in natural daylight and fresh air.

With a large variety of exercise types, this site appeals to the young and old, as well as the experienced and inexperienced.

Easy access to fitness and play supports physical and mental health and maintains and encourages regular exercise.

HAVNEØEN VEJLE, DENMARK

CASE STUDY: Completing the new residential development at Vejle Harbour inspired a desire to create a recreational area that appeals to both the city's young and older population.

■ ■ ■ The result is a dynamic activity space that combines both play and fitness. This space attracts families and offers both young and old a place to enjoy physical activity.

In addition to serving as a multifunctional area, the activity space emphasises aesthetics and natural beauty.

The playground equipment's dark green colours complement the nearby harbour and use recycled materials such as textile waste and discarded fishing nets. In combination with the anthracite fitness equipment, this area is a pleasant place to spend time and highlights the connection to nature, the harbour and the community.

This outdoor fitness centre offers a well-rounded workout with cardio equipment, a cross training system, step-up platforms and exercise benches.

WHISPERING PINES PARK FLORIDA, US

CASE STUDY: Nestled in a grove of towering oak trees off Florida's Treasure Coast is a public park where children, adults and teens can all be active together.

■ ■ ■ The park's outdoor fitness equipment is strategically placed to face the play-ground equipment, giving caretakers the option to work out while supervising younger kids.

Designed to accommodate a high volume of families in the fourth-largest growing metro in the United States,

as well as the nearby middle and high schools' student bodies that are transitioning away from traditional play equipment and toward fitness equipment, Whispering Pines Park is an inclusive green space for all ages to enjoy an active lifestyle.

This system allows the user to increase the weight resistance by increasing movement of speed when lifting the kettlebell.

SPORT E SALUTE, ITALY

CASE STUDY: Sport e Salute S.p.A. is a state-owned organisation that promotes sports and healthy lifestyles by providing sector-specific services and expertise to stakeholders in the sport system.

Since 2021, it has launched numerous initiatives and grant programmes throughout Italy, focusing on various projects that encourage sports participation and improve infrastructure.

One of the main initiatives is “Sport di Tutti”, which aims to promote social inclusion through sports.

KOMPAN Italy has participated in three of Sport e Salute’s grant programmes, installing over 150 sports areas in different regions of Italy.

All fitness equipment is white and customised with the Sport e Salute logo and includes a QR code that directs users to the Sport e Salute webpage, where exercise videos can be found.

Each fitness area comprises new, well-equipped exercise equipment for cross training, street workouts and cardio equipment connected with Bluetooth.

FITNESS PRO

Discover the pinnacle of outdoor fitness with our award-winning product line PRO fitness. Created to the highest possible standards, combining beautiful aesthetics with human-friendly design. The PRO line intrigues any park or recreational space and draws you in. The PRO range includes strength, cardio and functional training equipment, providing a comprehensive workout. Each piece boasts adjustable and scalable features, ensuring everyone can exercise at their own pace. Inclusive and accessible, our PRO fitness equipment invites everyone to join – elevating your community's fitness experience.

PRO CARDIO

Adjustable interactive workout

The striking Cardio range has been awarded the Good Design Award for its innovative and high-quality design. Our Cardio bikes have adjustable resistance and are geometrically tailored to specific workout needs.

The Arm Bike is wheelchair-accessible, and the Cross Trainer has an innovative sprint mode for shaping thighs and buttocks. All machines are on par with the best indoor machines!

FITNESS ESSENTIALS

Experience the Essential fitness product line, where functionality meets versatility. This range excels in flexibility and modularity, offering exceptional value for money. Designed for diverse workouts, the Essential line includes equipment for cardio, cross training, street workouts, mobility and obstacle courses. Whether aiming for a high-intensity session or a gentle exercise, this range caters to all fitness levels and needs. Enhance your community with the Essential range and provide an adaptable, cost-effective fitness solution.

KOMPAN

Let's move

CARDIO

Cardio equipment for every workout

The meticulously designed Cardio range features a variety of fitness machines: The Cross Trainer appeals to a wide demographic with its low-impact, full-body movement. Ergonomically optimised, it offers ten adjustable resistance levels, making it suitable for both rehabilitation and athletic conditioning.

The Arm Bike is inclusive for all fitness levels, featuring smooth magnetic resistance and adaptable space. The recumbent bike, ideal for seniors, boasts a comfortable design, adjustable backrest and ten resistance levels.

Lastly, the versatile Bike caters to various intensities, from gentle exercises to intense sprints, with an adjustable seat accommodating users of different heights.

MOBILITY

Balance, strength and mobility

The Mobility range comprises equipment that improves balance, strength and mobility. Suitable for older people for fall prevention and balance training and beneficial for those recovering from moderate or severe injuries.

Functional and flexible equipment with a focus on strength and coordination is also available for people in general who want to train their mobility.

FITNESS WOOD

The Fitness Wood product line is a smaller wooden range made from robinia. This range combines flexibility and multifunctionality with a lower carbon footprint. Perfect for diverse workouts, the Fitness Wood range includes equipment for street workouts and an obstacle course. Each piece features a warm wooden aesthetic that seamlessly fits into natural surroundings, with an FSC®-certified (C004450) option. Enjoy the same high functionality as the Essentials range while enhancing your park or recreational area with adaptable and cost-effective fitness solutions.

* Scan and read more about the documented benefits here:

STREET WORKOUT WOOD

Street workout in a natural style

Our Street Workout range is also available in Robinia wood. Perfect for bringing the urban street workout trend into a natural environment or bringing the natural environment into an urban setting.

Robinia wood is a solid material with very high levels of natural oils. Therefore, Robinia wood is the most suitable material for an outdoor fitness solution: long-lasting and close to maintenance-free.

For a greener future

Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

OBSTACLE COURSES WOOD

Obstacle courses in a natural style

The Robinia wooden obstacle courses are designed to challenge everyone. Smart step-ups and extra grips will make it easy for beginners to get started on the equipment, and due to the size and height of the equipment, even the most advanced athletes will find a way to challenge themselves!

Robinia wood is a durable material, making this a long-lasting, low-maintenance outdoor fitness solution.

For a greener future

Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

POWERFUL DESIGN WITH COLOURS

Create an individual expression

Distinct visual and creative expressions can be created by adding special colours to the steel parts of the fitness products.

Different colours can be chosen to make a statement, or to support and highlight an overall design theme, an aesthetic

approach, the surroundings of the fitness site or even to represent a specific brand or a corporate identity. Only the imagination sets the limits.

STEEL COLOURS

14 thrilling colours are offered in the standard assortment.

** The colour is available as matt or glossy

Awesome-looking fitness solutions can seem even more impressive in a red or a dark green colour.

The design of this fitness site has been created as an integrated concept and with a type of surfacing that gives maximum comfort during workouts.

A special type of UV- and weather-resistant paint is used to apply the symbols and markings on the FLEXOTOP™ ECO surfacing. For easy and accurate application, KOMPAN have designed a selection of template tools.

FUNCTIONAL SURFACING WITH FLEXOTOP™ ECO

With FLEXOTOP™ ECO, designers can be very creative. Different colours, shapes and graphics can support and highlight the overall design theme and also extend the functionality of the equipment to the surface. The soft, yet firm surfacing is highly inclusive, making it possible for wheelchair users to easily access the fitness site.

FLEXOTOP™ ECO is high-quality wet-pour surfacing from KOMPAN. From a safety perspective, this surfacing pro-

vides brilliant shock absorption thanks to its two-layer design. Functionality and quality is ensured through TÜV certification according to EN1177 and BS 7188.

From an operational point of view, FLEXOTOP™ ECO provides a clean and comfortable surface with very low maintenance costs.

Sets of symbols and markings painted on the surface optimise the use of the available site area. The patterns create specific areas for functional training based upon the graphic references on the floor.

MULTISPORT

MULTI USE GAMES AREAS

Multi-activities – the ball's in your court

The MUGA is to sport what a convenience store is to shopping. It provides an optimised arena, a focal point for activity and a place specifically designed to satisfy a need. These compact stadiums are an essential social asset to create a healthy and engaging community.

MUGAs are where rules are not set in stone but most certainly agreed upon. The only common rule is to have lots of fun.

COSMOS MULTI SPORT

A Player-friendly experience

Cosmos offers a variety of sporting activities. A basketball hoop at the correct NBA height hovers temptingly, and goals invite a game of football or handball. Kick-about games are great for social interaction, competitive yet fostering friendships and promoting active and healthy lifestyles.

Like the rest of the Multi Sport range, the Cosmos invites passing children to stop and ask, 'Can I join?'

WPC (Wood Plastic Composite)

Steel colours, all fine-texture matt steel

Hot-dip galvanised steel

3. Choose play types

4. Choose entrance module

5. Choose accessibility

FLEXIBLE CONFIGURATION

For Multi Use Games Areas

MAIN GOAL OPTIONS:

- Outside basket
- Fully closed steel
- Fully closed net
- Open goal sides for entrance
- Inclusive wheelchair entrance

PANEL OPTIONS:

- Steel tubes
- HDPE plates
- Wood Plastic Composite (WPC)
- Ball-catcher net

POST OPTIONS:

- Height from 1m to 5m
- Hot-dip galvanised
- Powder-coated Moss Green

ACCESS OPTIONS:

- Entrance gate
- Service gate
- Hockey entrance

PLAY OPTIONS:

- Multi goal (3x2m)
- Basketball goal
- Mini goal
- Panna goal
- Multi net
- Target-shooting panel

OUR COMMITMENT TO GREENER SOLUTIONS

Validated CO₂e calculations

Promoting fitness and play should go hand in hand with protecting our planet.

Our approach to product development ensures that our fitness products offer exceptional quality and durability and provide fitness sites with lower carbon emissions*. We work with Bureau Veritas to independently validate our method for calculating carbon footprints.

We help customers towards measurably lower carbon emissions by choosing either Made Green or Born Green products. We make data on carbon emissions and recycled content available for all standard products for comparison – Made Green or Born Green products.

Made Green means that products are made from post-consumer recycled materials such as ocean waste, used textiles, food packaging waste, used plastic bags etc.

Born Green means that products are made from nature's own building material, wood, sourced from sustainable forestry and are therefore naturally low in carbon emissions.

KOMPAN

QUALITY MATERIALS

1 COROCORD ROPES:

Strength and resistance combined

Our Corocord ropes are designed for optimal strength, abrasion resistance and all-weather durability. These ropes are made to withstand vandalism, ensuring longevity and safety in various environments. The ropes are tightly wrapped with tempered PES EcoYarn™, which is melted onto each strand using over 95% post-consumer recycled material. This process enhances the rope's durability and significantly reduces waste. Corocord ropes are available in eight colours and six dimensions (7mm, 16mm, 19mm, 21mm, 22mm, and 23mm) and cater to different needs while maintaining their environmental benefits. Depending on the size, the ropes have either a steel or fibre core, ensuring optimal application performance – Made Green.

2 ECOCORE™ HDPE PANELS:

Made from post-consumer recycled waste

EcoCore™ HDPE panels exemplify our commitment. These panels are manufactured from 95% post-consumer recycled waste, including the coloured cap layer. Panels in the colour teal are made from over 95% post-consumer ocean-recycled waste. This waste is collected from the maritime industry, such as fishing nets, ropes and trawl nets. By utilising these materials, we help reduce ocean pollution and support marine conservation efforts – Made Green.

3 ROBINIA PRODUCTS:

Natural durability and the option for FSC® certification

Our Robinia products are known for their high durability and do not require any chemical wood preservatives. This natural resilience makes robinia wood an excellent choice for outdoor fitness equipment. KOMPAN's Robinia products also come with FSC® certification (FSC®C004450), ensuring that the wood is sourced from responsibly managed forests – Born Green.

4 DECKS

All decks are supported by uniquely designed low-carbon aluminium profiles with multiple attachment options. The grey-coloured moulded decks are made from 75% post-consumer PP material with a non-skid pattern and texture surface.

5 POSTS

Main posts are available in four different materials.

1. Impregnated pine wood with in-ground steel footing.
2. Galvanised steel with powder-coated top finish.
3. Colour-anodised lead-free aluminium, made from low-carbon aluminium.
4. TexMade™ posts made from >95% post-consumer recycled textile and plastic waste.

6 GALVANISED STEEL

Our steel surfaces and steel frames are hot-dip galvanised inside and outside with lead-free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

COMPLETE TRANSPARENCY

Green data is available for all our products, for comparison of carbon emissions.

WARRANTY

We have industry-leading warranties

LIFETIME* warranty

- Hot-dip galvanised parts
- Stainless steel parts
- EcoCore™ and other high-density polyethylene (HDPE) panels

15-year warranty

- Robinia wood parts
- High-pressure laminate (HPL) parts
- Aluminium parts

10-year warranty

- TexMade™ posts
- Pre-galvanised posts with painted top layer
- Painted surface on galvanised or aluminium metal parts
- Stainless steel slides
- Electrogalvanised metal parts
- Moulded PP decks
- Solid plastic parts
- Hollow plastic parts
- Transparent polycarbonate (PC) parts
- Rope & net constructions
- Wood-plastic composite (WPC) parts
- Ash, pine and other wood types

5-year warranty

- Resin-coated plywood parts
- Springs & ball bearing assemblies
- Graphic print on transparent PC panels
- Concrete parts
- FLEXOTOP™ ECO system with virgin EPDM top layer
- Galaxy connection balls

2-year warranty

- Moveable plastic & metal parts
- Rubber membranes
- Screens and electronic parts
- FLEXOTOP™ ECO system with recycled EPDM top layer
- Sunshades & sail solutions
- Nylon nets
- Spare parts

WARRANTY COVERAGE

This warranty applies to KOMPAN's products for the time periods described for each product type above and with the limitations described in this warranty. The warranty period applies from the date of purchase by the first customer. This warranty covers only defects in materials, production errors and structural integrity failures caused by defects in design, materials or manufacturing. KOMPAN's liability under this warranty is limited to repair or replacement of defective products, without charge, at KOMPAN's discretion.

PROPER INSTALLATION AND MAINTENANCE

The warranty only applies if KOMPAN's products have been installed according to the instructions provided by KOMPAN and maintained correctly according to the KOMPAN Maintenance Manual. All warranty claims shall be accompanied by full documentation for proper installation and maintenance.

WARRANTY EXCLUSIONS

This warranty does not cover any damage caused by accident, improper care, negligence, normal wear and tear, surface corrosion on metal parts, discoloured surfaces and other cosmetic issues or failures due to misuse or vandalism. Natural changes in wood over time are considered cosmetic issues and are not covered.

NEAR WATER INSTALLATIONS

Products installed in direct contact with chlorinated water or saltwater (Waterparks), or products installed within 200 metres from the shore are not covered by the KOMPAN warranty for any defects caused by corrosion. Specially designed products (handled via the department for customised products), provided they have been upgraded to corrosion class C4 prior to delivery, installed within 200 metres from the shore (and not in direct contact with saltwater/spray of saltwater or chlorinated water (e.g. water parks) shall, subject to the applicable warranty period for each product type set out in the general warranty, be covered only against structural failure caused by corrosion (excluding moving parts) and under no circumstances for any period longer than 10 years.

* KOMPAN's LIFETIME warranty is in effect for the lifetime of the product until the product is uninstalled and/or taken out of use. In addition, KOMPAN's general terms and delivery conditions apply and supplement this warranty.

SEE MORE

THIRD-PARTY SUPPLIED PRODUCTS & SERVICES

KOMPAN provides non-KOMPAN branded products and installation services performed by certified third-party suppliers. This general KOMPAN warranty does not apply to such non-KOMPAN branded products and installation services, which may carry their own warranties. KOMPAN will pass on information on such warranties where possible.

FREIGHT AND WAREHOUSING

Global transport and logistics arranged by KOMPAN appointed forwarder. Products/items are not to be stored outside waiting for installation and must be kept dry at all times.

INSPECTION PROGRAMME FOR DYNAMIC FITNESS EQUIPMENT

Even premium fitness equipment requires care to maintain its quality. Like cars, which need regular maintenance for optimal performance, our dynamic fitness equipment (cross trainers, arm bikes, city bikes and strength training equipment) also needs proper, regular care to remain in top condition. These products perform in all weather conditions and contain moving parts that benefit from consistent maintenance.

What is an inspection programme?

An inspection programme is an agreement with us to maintain your dynamic fitness equipment after installation. We conduct regular care inspections, carry out minor repairs and keep you informed about the condition of your equipment.

Why invest in an inspection programme?

Investing in an inspection programme ensures your dynamic fitness equipment lasts longer and functions better.

Regular inspections help address minor issues before they become costly problems, reducing worry, downtime and unexpected costs.

What does an inspection contract cover?

All KOMPAN's dynamic fitness equipment comes with a substantial two-year warranty. During the first two years, we cover costs on issues under our warranty conditions. However, the warranty does not cover defects caused by vandalism, improper care, negligence and normal wear and tear. Regular care should be an integral part of your initial investment in outdoor fitness equipment.
