

Publisher: KOMPAN A/S

KOMPAN Group is one of the world's leading manufacturers of outdoor activity areas.

For more than 50 years, the company has designed, manufactured and marketed an extensive range of highquality playground equipment, outdoor fitness equipment, and outdoor furniture.

KOMPAN® products are sold around the world through KOMPAN subsidiaries, agents and distributors.

Made Green

means that products are made of up to 95% post-consumer recycled materials such as ocean waste, used textiles, food packaging waste, used plastic bags etc. Our Made Green products are made with an approximately 50% reduction in carbon emissions compared to similar traditional products made from virgin sources (depending on the chosen product).

Born Green

means products are made from natural hardwoods like robinia. Robinia is highly durable and does not require any chemical wood preservatives. KOMPAN Robinia products also come with FSC® certification (C004450).

Look for the icon

This icon marks selected product examples with extra high percentage of recycled material and reduced carbon

Play equipment

marked with this symbol is designed to meet KOMPAN's inclusive guidelines. It can be accessed and used to varying degrees by all children, including children with a range of disabilities.

Fitness equipment marked with this symbol can be used directly from a wheelchair.

Fitness equipment marked with this symbol can be used by everyone on equal terms independent of gender, age, body weight, fitness or cognitive skills.

Quick Supply (QS)

means that the products are delivered 10 working days sooner than the normal delivery time for standard products.

Look for FSC®-certified products on product pages. The mark of Responsible Forestry.

CREATING HEALTHIER AND HAPPIER COMMUNITIES

This is who we are, a round dot in a square world

We have come a long way since the early days of KOMPAN. What began in the Danish artist Tom Lindhart's cellar in the 1970s has now moved into purpose-built headquarters in Odense, offices worldwide and a huge factory in the Czech Republic, from which deliveries are sent every 44 minutes to anywhere in the world. Whether an entirely new playground, an integrated play and fitness site or a significant landmark, we have a solution.

Our purpose and promise

Creating healthier and happier communities back then, today and tomorrow will always be our driving force. Whether you are new to KOMPAN or already know us, this is who we are:

KOMPAN is fundamentally all about play, activity and social infrastructure — like when children in a bleak and grey housing estate started

clambering over a piece of contemporary art in the 1970s. For over 50 years, we have led the way in playground and fitness innovation, crafting environments that foster community and well-being. We specialise in bespoke solutions tailored to your vision and brought to life by our expert team of consultants, architects and project managers.

KOMPAN, a half-century on, three generations from those first kids clambering on art, is and promises to continue to be at the forefront of understanding the unquestionable value of play and fitness.

Let's play!

Works of "play"

That original street art, designed to help distinguish between anonymous blocks of flats, became a focal point, a plaything, and the artist Tom Lindhardt didn't mind. In fact, it was what he'd dreamt of. With the support of a similarly inspirited entrepreneur, Mogens Fenne Frederiksen, they formed a company and started a revolution in play.

A TRUSTED PARTNER IN PLAY AND FITNESS

This is what you get

Ethics in everything we do

For more than 50 years, KOMPAN has been committed to our users and customers. Every year, we invest significantly in research, innovation and product testing, which enables us to create playgrounds and fitness sites that have best-in-class play value, training effects and safety standards. We also uphold our responsibility to society through ambitious green initiatives and practices. The use of post-consumer recycled waste sources has been integrated into the core of our business, and we keep pushing the boundaries on more sustainable materials on behalf of the entire industry. Self-manufacturing in our own production facility, using only the very best materials, enables us to deliver playgrounds and fitness sites with the highest durability and longevity. All in the name of creating healthier and happier communities. Read more about this on pages

Unique products and innovation

Our iconic products, or should we say "works of play", such as the Crazy Hen, Supernova, Cliff Rider and Spacenet™, showcase our pioneering spirit in design, combining craftsmanship with a commitment to our Danish design heritage. KOMPAN was born out of art. Half a century ago, sculptor Tom Lindhardt observed children playing on his artistic creations. Tom turned the process full circle to allow playgrounds to become beautiful and timeless, like art objects. In the succeeding years, along came our market leading scalable and adjustable fitness products that replicate the functional and effective fitness as we know it from indoor facilities. Read more about this on pages 4-5.

KOMPAN Play Institute

The KOMPAN Play Institute has been part of developing, researching and advocating playgrounds for KOMPAN since the 1980s. The institute merges cutting-edge research in child development with hands-on testing, ensuring our designs inspire and engage children of all abilities. Our commitment is backed by rigorous documentation, white papers and publications that delve deep into playground-specific topics. The aim is to ensure children develop social, cognitive, health and creative skills through our WOW, STAY & DEVELOP design approach. Beyond design, we offer expert consultancy and advocacy, shaping city planning to prioritise spaces where every child can thrive. Read more about this on pages 10-11.

KOMPAN Fitness Institute

As the creators of real outdoor fitness, we commit to and design spaces that challenge and engage all ages and abilities with effective workouts. Exercise and fresh air are natural partners and the universal formula for feeling good. Today, we are aware of the positive results of physical exertion. Our 21st-century lifestyles demand it, but to get it right takes a scientific approach to what to do, how to do it and what to do it on. This is where research, design and product innovation meet reality. We collaborate with sports physiologists, physiotherapists, universities and researchers to deliver effective outdoor equipment. Read more about this on pages 12-13.

Customised solutions

We know that our customers are different and want something different from their playground or fitness space: aesthetics, thematisation, age groups and number of children able to play simultaneously. A theme park may want to make a WOW playground to attract children. A school may want a playground where the children burn energy, enabling them to concentrate during lessons. A municipality may want to create an activity site with both a playground and fitness equipment. So, our architects, landscape architects and designers tailor solutions to your users, your environments and your wants and needs. Read more about this on pages 22-23.

Unique landmarks and concepts with KOMPAN Design Studio

KOMPAN's Design Studio creates unique, built-from-scratch playgrounds and fitness sites tailored to communicate something about the community they serve. These sites are landmarks, as distinctive as a gift of nature or an architectural gem. From Australia to France, Germany to Singapore, these are unique statements from communities wishing to stand out, ready to make their mark. Read more about this on pages 26-31.

Inclusive, universal design for play and fitness

Our design philosophy is that everyone should feel included. Play and fitness are for everyone, regardless of their physical or mental ability. The human need for play, physical activity and social interaction across abilities is what we plan for. Facilities that aren't merely accessible but also inclusive of and usable by all to the greatest possible extent. Each playground and fitness site mirrors the needs of those who use it, whether to play, exercise or sit and watch the next generation evolve. Universal, inclusive design means a stigma-free playground for everyone. Read more about this on pages 10-13.

Guidance from idea to finished project

Building a playground may sound as easy as playing, but can be a very complex and complicated process. We are ready to take the burden off your shoulders and be your partner in the process. We help you find the best products and best layout for you, your users and your site. We make sure that everything gets to site and on time, clearing the site, digging out for foundations, installing products, laying the safe surfacing, and putting in paths, fences, benches etc. With in-house production in most markets as well as installation, we maintain full control of every project. Our certified installers and superior aftermarket service guarantee lasting satisfaction. Read more about this on pages 24-25.

The highest-quality materials

Playgrounds will have to stand the wear and tear of weather and heavy usage. A KOMPAN site will look great for years and require little effort or maintenance because only that way will users get as many hours of joy as possible. Therefore, we use the highest-quality materials that look inviting for decades to come and require the least amount of maintenance. This is also why our warranties are best in class. Over time, this has proven to be the most effective and cost-efficient solution. Read more about this on pages 20-21.

WOW factor

The eyes open wide to capture the full scene, the mouth forms an O, sucking in more air in expectation of action, the legs run wildly in search of adventure. This is the WOW factor, the moment of arrival at the playground that marks out a KOMPAN design from all others. It satisfies the child's instinctive demand for change, variety and advancement. The constant cry for something new and exciting is only successfully met by triggering that initial WOW.

STAY factor

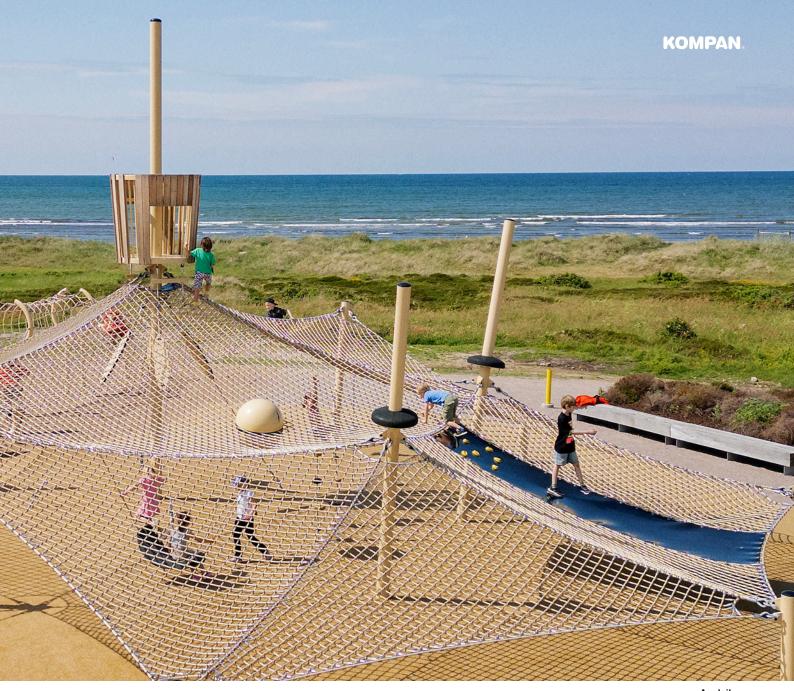

'Oh no, not yet' is the expression we most love to hear in response to the suggestion to head home. It epitomises the STAY factor. Each time a play feature is approached, it should be a fresh encounter, open to new interpretation. The STAY factor nurtures social interaction, inspiring children of all ages and abilities to stay and play longer.

DEVELOP factor

Play is all about fun — well, not all. Behind the laughter, and sometimes tears, it is about development; personal, cooperative and competitive. The DEVELOP factor is the endless mission of the KOMPAN Play Institute experts. These specialists craft ways of developing motor skills, coordination and balance. Intellectual learning is equally vital, with cognitive development, communication, language expansion and understanding of how to turn the germ of an idea into a successful conclusion.

Apelviken Varberg Municipality, Sweden

In collaboration with: Landscape Architects
Pär Selander and Åsa Svensson

PLAY THE KOMPAN WAY

Described in three little words: WOW, STAY, DEVELOP

KOMPAN's unique universal solutions attract more users, make them stay longer, and make them return again and again. Because whatever we develop, we develop together with our users: children of all ages and abilities. WOW, STAY, DEVELOP, three distinct factors that are moulded into every KOMPAN solution and radiantly displayed in the happy faces of each new generation. Play is the open door to the future, for all.

PLAY VALUE GUARANTEED

At the KOMPAN Play Institute, we have studied child development and children's outdoor play for four decades

Play is vital for child well-being and life skills, be it for a toddler or a teenager. So KOMPAN playgrounds are carefully designed to motivate all children to play; to play relentlessly again and again, while developing important life skills and also friendships. Children need play stimulation for their physical, cognitive, creative and

social-emotional development. This includes children with both invisible and visible disabilities. Especially with the rise in neurodiversity diagnoses. So, our research aims at creating playground equipment and playgrounds for all: accessible, inclusive and usable in play.

Recording children's outdoor play

With action cameras and movement screening, we study what triggers children to play, and continue playing. We learn what makes children play, move, talk and cooperate. This informs our product design to stimulate, for instance, social-emotional skills, language and communication.

2 Scientific and focused research

Science and universities are a major source of our fundamental research and knowledge. We cooperate with universities and draw on this in all product development. The collaboration takes several forms, such as joint industry PhD students.

3 Following and sharing research

To constantly stay on top of new research, KOMPAN Play Institute participates in conferences, building networks to share and gain insight and knowledge.

Playgrounds for all

Accessible, inclusive and usable in play:

- · Is it developed with users?
- Is it spacious and can accommodate different body positions, sizes and abilities?
- Is it thrilling, challenging and pleasurable?
- Is it rich in play variation: sensory, physical, social-emotional, cognitive-creative?
- Is it transparent and 360-degree design: play all around?

4 User workshops

Children are the experts in what motivates them to play and what they like to play. Their preferences develop with age and with cultural changes. We conduct workshops where children share their ideas on playgrounds and give us feedback on our newest ideas.

5 Testing new play ideas

Prototypes are tested at their earliest stages in order to prove and perhaps improve their child and age relevance. This helps fine-tune important basics, like the placing of components and creating interaction in teamwork.

6 Prototypes in their natural habitat

When children play in their outdoor setting, and on their terms, they use play features differently from a laboratory setting. We install prototypes in kindergartens and schools to ensure that the children truly get the benefit we intended, and that they deserve.

THE SCIENCE OF EXERCISE

The KOMPAN Fitness Institute develops science-based, user test-informed equipment and design recommendations. It's where research, design and product innovation meet reality

At the KOMPAN Fitness Institute, we use science to create outdoor fitness equipment and solutions. Outdoor fitness has traditionally been based on simple equipment with less functionality than indoor fitness. However, the available equipment must provide real exercise

benefits and a positive user experience to motivate people to exercise regularly. When developing outdoor fitness products that provide an optimal exercise experience, we focus on two key aspects: ergonomics and the resistance experienced by the user.

1 User study: all types of user needs

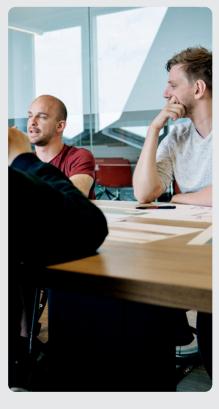

First, we gather data from our users through structured user studies. To enable the best designs, we conduct methodic research on our target users to expose problems and design opportunities by analysing the target audience's needs and pain points.

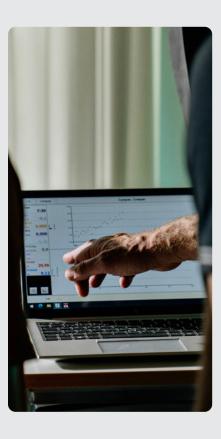

2 Using science and knowledge

Then, we turn to science to deeply understand our target audiences' behaviours and needs. We collaborate with multiple scientific disciplines within the Faculty of Health Sciences, nationally and internationally, to uncover all relevant insights and knowledge.

3 Leveraging user research with user workshops

User workshops are a critical part of our design process. This is where we gain valuable insight through usability testing and accessibility evaluations from users in their own environment.

All our individual fitness products together form a fitness solution that benefits the user. To have a real impact, creating ideal solutions for any specific type of user, regardless of their abilities, needs to be evidence-based.

4 Collaboration with exercise experts, designers and engineers

We then put any issues in perspective collaborating with exercise experts, designers and engineers to ensure our products create value and provide the most social and effective user experience for all abilities.

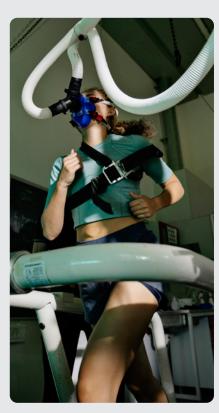

5 Lab-testing and iterations

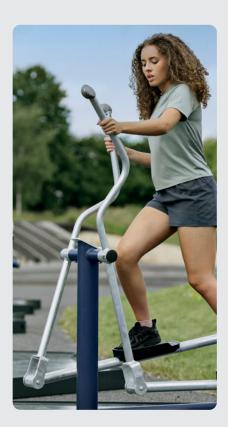

Prototypes are tested at their earliest stages. We conduct biochemical, movement pattern, muscle group and oxygen uptake analyses to put the product to the test. This ensures that we deliver the most effective outdoor fitness equipment possible.

6 Feedback from users = more than 1000 sites worldwide

The end product is ready to use. We get instant feedback from our users worldwide. The science behind it provides not only optimal user experience but also a durable, robust product that withstands the test of time and wear and tear.

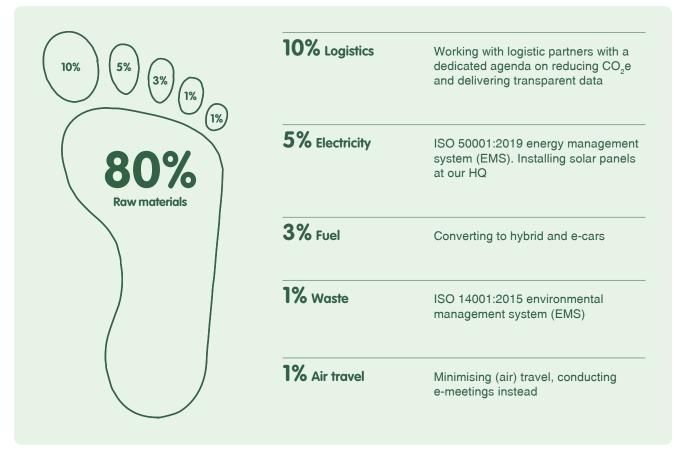

VIRGIN RAW MATERIALS - THE CLIMATE CULPRIT OF CO₂e

We are taking significant steps to tackle the #1 climate culprit in our business: raw materials. The GHG guidance and tools identified the issues, and then we worked on reducing our emissions. To make fundamental changes, we needed to look at the entire life cycle of our products. It is a continuous journey for us. This is how far we have come:

KOMPAN chose the Greenhouse Gas Protocol to focus our efforts on the areas with significant impact on reducing our carbon footprint. We found that approximately 80% of the carbon emissions were a result of the use of raw materials in our production of playground

and fitness equipment. We turned data into action, and from 2024, we can now make colourful playgrounds with 95% recycled materials, using post-consumer recycled waste in HDPE panels, tempered Corocord[™] rope with EcoYarn[™] and TexMade[™] posts.

JOIN OUR GREEN JOURNEY

HDPE EcoCoreTM
95% post-consumer recycled waste in all colours.
Teal in ocean waste.

Rotomoulded
33% post-consumer recycled waste in all colours.
Teal in ocean waste.

TexMade™ posts 95% post-consumer recycled textile and plastic waste.

Moulded PP parts 75% post-consumer recycled waste.

are made from 75% post-consumer recycled waste.

Tempered Corocord rope with EcoYarn™

Our Corocord ropes are designed for optimal strength, abrasion resistance and all-weather durability. These ropes are made to withstand vandalism, ensuring longevity and safety in various environments. The ropes are tightly wrapped with EcoYarnTM in >95% post-consumer recycled material, which is melted onto each individual strand. This process enhances the rope's durability and significantly reduces waste. Corocord ropes are available in eight colours and six dimensions (7mm, 16mm, 19mm, 21mm, 22mm, and 23mm) and cater to different needs while maintaining their environmental benefits. Depending on the size, the ropes have either a steel or fibre core, ensuring optimal application performance.

VALIDATED CO₂e CALCULATIONS

For many years, we at KOMPAN have been working with sustainability and environmental concerns in our product development as well as in our sourcing and production, and we do not take easy steps in making green claims:

We work with Bureau Veritas who validates our method for calculating carbon footprints. We also enable customers to choose lower carbon emissions by choosing products that are either Made Green or Born Green.

We make carbon footprint data available for all standard products for comparison of carbon emissions data. These can be found on our websites and product sheets — Made Green or Born Green products versus traditional products.

Complete

carbon emissions.

transparency
Green data is available for all our products, for comparison of

Born Green means products are made from natural hardwoods like robinia. Robinia is highly durable and does not require any chemical wood preservatives. KOMPAN Robinia products are also available with a FSC®certification (C004450).

Made Green products are made of up to 95% post-consumer recycled materials: ocean waste, used textiles, used plastic bags etc. Made Green products have an approx. 50% reduction in carbon emissions compared to traditional products made from virgin sources.

MADE FROM RAW **MATERIALS WITH LOWER CARBON EMISSIONS**

Made Green from post-consumer waste or Born Green from nature

Tempered Corocord™ ropes

are tightly wrapped with EcoYarn™ in >95% post-consumer recycled material, which is melted onto each individual strand - Made Green.

BLOQX™ climbing panels

are made from 75% post-consumer recycled waste from e.g. household waste, and the Teal colour version is made from ocean recycled waste only - Made Green.

Robinia products

are made of robinia wood from primarily FSC®-certified (C004450) forestry that develops so much oil when growing that it is self-sustaining and very long-lasting - Born Green.

1. Coloured panels

in EcoCore™ HDPE are made from >95% post-consumer recycled waste, including the coloured cap layer - Made Green.

2. TexMade™

posts are made from >95% post-consumer recycled textile and plastic waste Made Green.

Decks

are made from 75% post-consumer recycled waste - Made Green.

4. Extruded aluminium

profiles are made using low-carbon aluminium — Made Green.

5. Ocean Green panels

in the colour Teal are made from >95% post-consumer ocean recycled waste collected from the maritime industry, such as fishing nets, ropes and trawl nets -Made Green.

Coloured rotomoulded components

used for Supernova, Spinner Bowl, Tipi Carousel etc. and made from 33% post-consumer recycled waste from e.g. household waste. The Teal colour version is made from ocean recycled waste only — Made Green.

HIGHEST QUALITY MATERIALS

Panels

The 19mm EcoCore[™] panels are made from a highly durable and eco-friendly material that is not only recyclable after use but also made from >95% post-consumer recycled waste.

Decks

All decks are supported by uniquely designed low-carbon aluminium profiles with multiple attachment options. The grey-coloured moulded decks are made from 75% post-consumer PP material with a non-skid pattern and texture surface.

Nothing lasts forever. All playgrounds face the trials of weather, use and abuse, and will eventually succumb to the ravages of time. That day can be postponed for a lifetime by using the finest of materials, the cleverest of designs. Quality costs, but quality also lasts. A simple equation that in the fullness of time pays dividends.

Tempered Corocord™ rope with EcoYarn™

Ropes come with galvanised six-stranded steel wires and a steel core, impossible to wear through. Each strand is tightly wrapped with EcoYarn™ in >95% post-consumer recycled material, which is melted onto each individual strand, making the ropes highly wear and vandalism-resistant.

Posts

Main posts are available in five different materials.

- 1. Impregnated pine wood with in-ground steel footing.
- 2. Galvanised steel with powder-coated top finish.
- Colour-anodised lead-free aluminium, made from low-carbon aluminium.
- TexMade[™] posts made from >95% post-consumer recycled textile and plastic waste.
- 5. Low-carbon pre-galvanised steel posts made from 80% post-consumer recycled material.

Galvanised steel

Our steel surfaces and steel frames consist of a hot-dip galvanised inside and outside with lead-free zinc. The galvanisation has excellent corrosion resistance in outside environments and is maintenance free.

Robinia wood

Robinia wood is a very strong and long-lasting material with a very high level of natural oils. Thus Robinia wood makes durable playgrounds which are close to maintenance free and able to last for many years.

WARRANTY

We have industry-leading warranties

LIFETIME warranty

- · Hot-dip galvanised parts
- Stainless steel parts
- EcoCore[™] and other high-density polyethylene (HDPE) panels

KOMPAN's LIFETIME warranty is in effect for the lifetime of the product until the product is uninstalled and/or taken out of use. In addition, KOMPAN's general terms and delivery conditions apply and supplement this warranty.

15-year warranty

- · Robinia wood parts
- High-pressure laminate (HPL) parts
- · Aluminium parts

10-year warranty

- TexMade™ posts
- Pre-galvanised posts with painted top layer
- Painted surface on galvanised or aluminium metal parts
- Stainless steel slides
- Electrogalvanised metal parts
- Moulded PP decks
- Solid plastic partsHollow plastic parts
- Transparent polycarbonate (PC) parts
- Rope and net constructions
- Wood-plastic composite (WPC) parts
- Ash, pine and other wood types

5-year warranty

- Resin-coated plywood parts
- Springs and ball bearing assemblies
- Graphic print on transparent PC panels
- Concrete parts
- FLEXOTOP™ ECO system with EPDM top layer
- Galaxy connection balls

2-year warranty

- Moveable plastic and metal parts
- Rubber membranes
- Screens and electronic parts
- Sunshades and sail solutions
- · Nylon nets
- Spare parts

Warranty coverage

This warranty applies to KOMPAN's products for the time periods described for each product type above and with the limitations described in this warranty. The warranty period applies from the date of purchase by the first customer. This warranty covers only defects in materials, production errors and structural integrity failures caused by defects in design, materials or manufacturing. KOMPAN's liability under this warranty is limited to repair or replacement of defective products, without charge, at KOMPAN's discretion.

Proper installation and maintenance

The warranty only applies if KOMPAN's products have been installed according to the instructions provided by KOMPAN and maintained correctly according to the KOMPAN Maintenance Manual. All warranty claims shall be accompanied by full documentation for proper installation and maintenance.

Warranty exclusions

This warranty does not cover any damage caused by accident, improper care, negligence, normal wear and tear, surface corrosion on metal parts, discoloured surfaces and other cosmetic issues or failures due to misuse or vandalism. Natural changes in wood over time are considered cosmetic issues and are not covered.

Near water installations

Products installed in direct contact with chlorinated water or saltwater (water parks), or products installed within 200 metres from the shore are not covered by the KOMPAN warranty for any defects caused by corrosion. Specially designed products (handled via the department for customised products), provided they have been upgraded to corrosion class C4 prior to delivery, installed within 200 metres from the shore (and not in direct contact with saltwater/spray of saltwater

or chlorinated water, e.g. water parks) shall, subject to the applicable warranty period for each product type set out in the general warranty, be covered only against structural failure caused by corrosion (excluding moving parts) and under no circumstances for any period longer than 10 years.

Third-party supplied products and services

KOMPAN provides non-KOMPAN branded products and installation services performed by certified third-party suppliers. This general KOMPAN warranty does not apply to such non-KOMPAN branded products and installation services, which may carry their own warranties. KOMPAN will pass on information on such warranties where possible.

Freight and warehousing

Global transport and logistics arranged by KOMPAN's appointed forwarder. Products/items are not to be stored outside while waiting for installation and must be kept dry at all times.

LET'S PLAN WITH KOMPAN'S PLANNING RESOURCES AND TOOLS

- With the 8-step Playground Planning Checklist and downloadable product files

With over 50 years of experience building amazing playgrounds and outdoor gyms worldwide, we've learned a thing or two about planning for success. Our playground planning tools and resources will help you simplify the process and make the right decisions.

We approach playground planning by looking at the following factors:

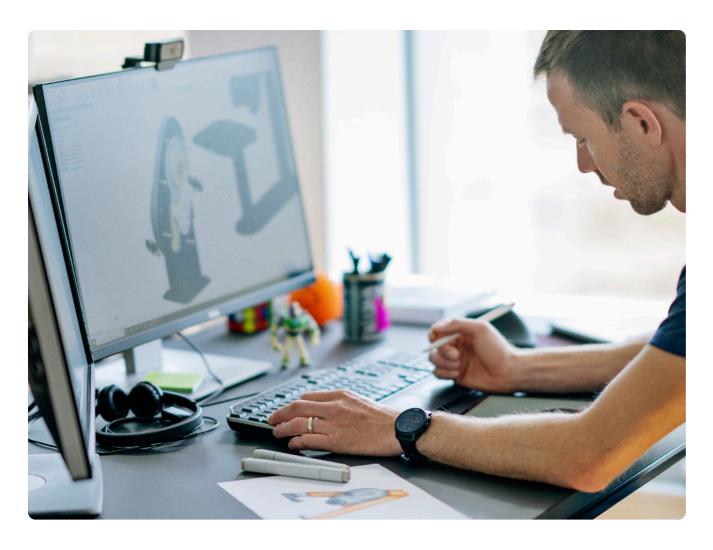

- Budget and funding
- Theme, design and desired aesthetic
- 3 Users and target audience
- 4 The purpose of the playground
- **5** Zoning and range of play types
- 6 Safety surfacing that matches the playground style
- 7 Timeline and building
- **8** Government regulations and safety

Visit our website to download the Playground Planning Checklist and to learn more about fitness-site planning.

How to download playground design files

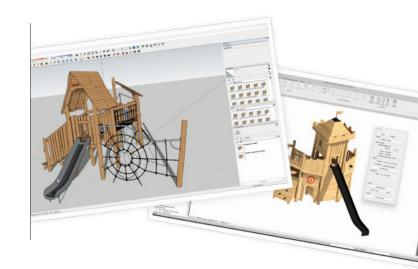

Once you have the fundamentals in place for your project, getting help to create your vision has been made easy.

For all of KOMPAN's products, we have made an array of playground and fitness design files available to help you better decide on products and equipment and make the most of the space you are designing. Under each product, you'll find a product sheet, 2D files, 3D DWG models, CAD files and 3D SketchUp drawings. You can also send us a request for tender specifications texts.

INSTALLATION AND AFTER SERVICE

KOMPAN installation teams worldwide have decades of experience in the playground and fitness-site industry

Our ISA department offers high-quality repair services and installation* for our customers as well as maintenance agreements to ensure playgrounds and fitness sites are installed and maintained to the highest standards. Over the last 50 years, we have worked with the public

and private sectors. It is, therefore, safe to assume that our professional installers have worked with virtually any playground or fitness equipment, landscape and situation imaginable. There are different stages to installing a playground or fitness site:

* Please check your local or regional KOMPAN office for installation possibilities, as our ISA service offerings may vary from country to country.

Pre-installation site visit*

We begin with a site visit to ensure the area is ready for installation. This includes checking access for trucks, bobcats or cranes and clearing old surfacing or equipment. We'll also map underground utilities such as water, gas, power and drainage and clear any roots, trees or plants. Excess soil may also need removal, potentially affecting installation time and cost.

* Please process local permits before installation, as approval times vary by region.

2 Installation process

Our professional installation covers project supervision, safety surfacing, landscaping and assembly. For safety, all equipment must be installed by trained experts following local regulations and KOMPAN's strict guidelines.

3 Post-installation inspection

After installation, we conduct a full inspection to confirm every detail meets safety standards. KOMPAN also offers inspection services for playgrounds built by third parties.

INSPECTION PROGRAMMES

An inspection programme is an agreement with us to maintain your dynamic fitness equipment or playground equipment after installation*. We conduct regular care inspections, carry out minor repairs and keep you informed about the condition of your equipment. Investing

in an inspection programme ensures your dynamic fitness equipment and playground equipment last longer. Regular inspections help address minor issues before they become costly problems, reducing worry, downtime and unexpected costs.

* Please check your local or regional KOMPAN office for after-service possibilities, as our ISA service offerings may vary from country to country.

Inspection services

KOMPAN offers four types of inspections, whether your playground or fitness site is installed by us or a third party:

- Safety inspection
- Functional inspection
- Visual inspection
- Delivery inspection

You can always contact us for a tailored quote on an inspection agreement.

2 Service and maintenance

We provide regular maintenance to extend the life of your KOMPAN equipment, including:

- Tightening loose fasteners
- · Replacing broken or worn parts
- · Levelling and replenishing surfaces

Our Expert Maintenance Agreements cover all brands serviced by KOMPAN-certified technicians. For those managing repairs in-house, our Repairs in Own Management agreements offer parts and support for a seamless process.

3 After sales

To keep your playground and fitness site safe and functional, we offer various service and repair agreements. Regular inspections are recommended, even though our equipment is built to last.

We offer:

- Functional inspection (three year recommended)
- · Safety inspection (one year recommended)
- Repair readiness

MAKE YOUR SPECIAL PLACE COME TRUE

Across the world, communities and companies want to create landmark locations that bring children, adults and communities together and function as great destinations for visitors.

At KOMPAN Design Studio, we understand that our focus on WOW, STAY and DEVELOP is essential when designing and building landmark playgrounds and fitness sites.

The site solution must be beautiful, but it must also be fun and challenging. We do this by utilising our unique architectural and engineering experience in collaboration with knowledge from the KOMPAN Play Institute and KOMPAN Fitness Institute. We create playgrounds and fitness sites that children and adults want to stay at, come back to and talk about as great destination sites to visit for a fun day out.

TAILOR-MADE

Understanding your dream: A school may want a play sculpture that symbolises wisdom and learning. A local community may want their play sculpture to tell a story about the community, connecting one generation to the next. Whether you are looking for a customised playground or fitness site, the process looks like this:

1 Finding the perfect concept

Together we find the perfect concept for your story. E.g. we can conceptualise a train station for a station town or municipality that wants to signal something with train transportation.

2 Researching the concept

Next, the design team will study the phenomena in order to find the features that visualise your story the right way. For train transportation, a freight train could be key.

3 Sketching design ideas

The first sketches are made and delivered to you in order to test ideas and find the perfect design for you.

4 Loaded with play and activity

Your play sculpture is loaded with the portfolio of play features that we have invented throughout half a century.

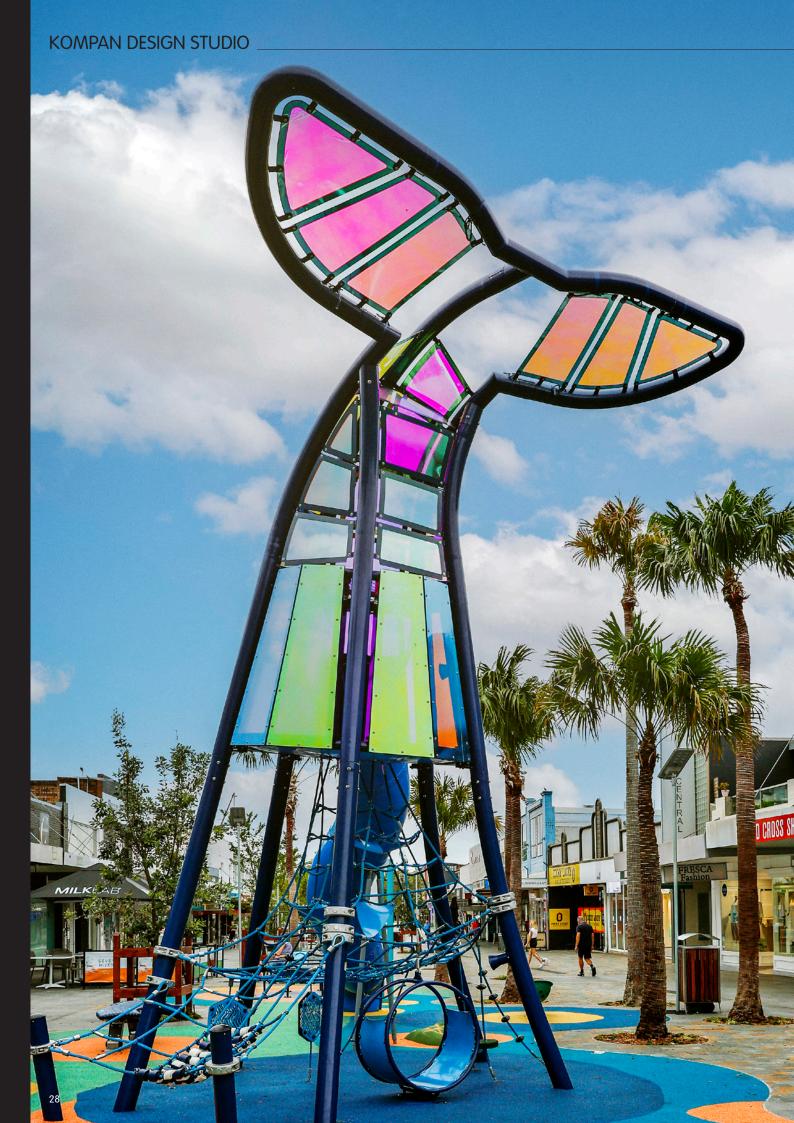

5 Building the sculpture

Our engineers make sure that the static structure is safe and sound. We use the highest-quality materials in order to build a landmark that lasts for decades.

6 The final structure

Based on the initial idea, created by skilled designers, engineers and craftsmen, the final structure is, in this case, a train, now ready for children to come and play for hours and hours.

Taylor Farm Park Sandston, Virginia, USA

North Bend Elementary School Houston, Texas, USA

TURNING THEMES, IDEAS AND STORIES INTO PLAY LANDMARKS

For more than a decade, we have built tailor-made and highly unique landmarks that WOW children and adults to come and play. They come in all kinds of themes and can be moulded and thematised to your local area and community, or to fit a specific environment. Always loaded with the play activities we have developed over half a century.

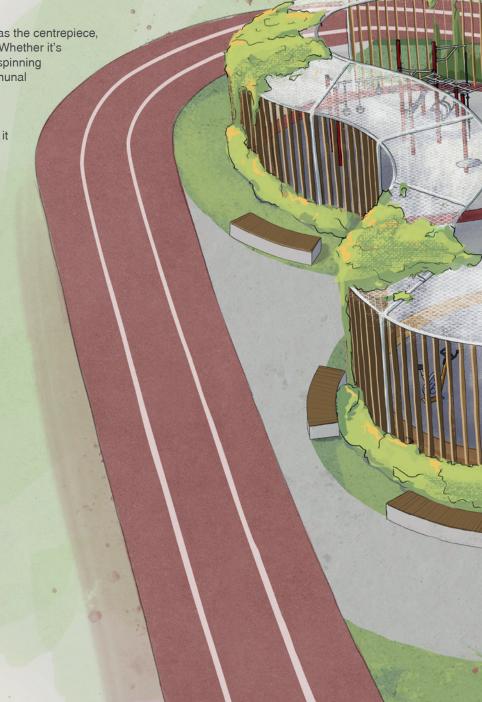

The structures are made of highly durable and vandalism-resistant materials that make them last for decades to come. Also, they are safe and certifiable like all products we have built over the past 50 years.

Imagine stepping into a world where the boundaries between fitness and nature blur, where the urban landscape transforms into a sanctuary for movement, mindfulness and connection. This concept, this sculpture, Space Creation, redefines the modern fitness experience — integrating architecture, wellness and the outdoors into a seamless flow.

At its heart, an elevated platform emerges as the centrepiece, effortlessly facilitating a range of activities. Whether it's morning yoga as the sun rises, an intense spinning session, strength training, or simply a communal hangout space, this platform adapts to the rhythms of the day.

This space is more than just a fitness area; it allows connection, movement and serenity within the urban landscape. It's a holistic approach to creating fitness for all.

Ice cream cart

The details of this ice cream cart are amazing, and the narrative is evident. With built-in containers for ice cream and toppings and a counter drawer, the intention is clear. A customisable cart sign is just the cherry on top.

TALES FROM THE **KOMPAN TOWN**

Home to play, fun and laughter

This year, we introduce a town-themed playground concept that ignites children's imaginations through role-play and storytelling.

The MOMENTS $^{\text{TM}}$ playground concept is structured like a miniature town with key landmarks such as a fire station and truck, a charming townhouse with a café, a famous ice cream cart and a big hangout tree with a hideaway.

Each structure is intricately designed with familiar details, story prompts and a bright colour palette that draws children into a vibrant world of themed play.

KOMPAN's new concept inspires children to create, explore and connect meaningfully by combining a town's familiar setting with the limitless possibilities of role play.

Fire station with built-in fire engine

Play is centred around the command-and-control room close to the fire engine so everyone can stick together when the alarm bell goes off.

A real café — latte, cortado or flat white
At the KOMPAN café, you can get any coffee you need.
Enjoy the coffee on the roof terrace or outside to get that French pavement café vibe.

Surfacing enhances the play value

The KOMPAN town theme comes to life with supporting themed surfacing. Children love to create their own stories,

and we enjoy jump-starting their play creativity with numerous ways to explore. The town can come to life — from the little lake with the big tree house to the fire station. 33

Easy access to elevated play activities An easy-access staircase to the structure's elevated play activities ensures play for all.

Details ensure durability

We have enhanced structural integrity by treating the wood with coloured oil and protective features, extending the wood's usefulness and life.

A WOODEN WONDER

New material and features — the same play activities

We are excited to introduce our MOMENTS™ range, now crafted in beautiful pinewood*. This new offering brings the nostalgic charm of a backyard treehouse to public playgrounds, blending traditional treetop houses' imperfect, self-built feel with modern design.

The use of pinewood not only provides a natural, inviting aesthetic but also ensures durability for endless playtime adventures. Our MOMENTS™ range in pinewood invites preschoolers and school-age children to explore, dream and play in a world reminiscent of treehouse adventures.

Designed to blend perfectly with the entire MOMENTS™ range and offer great flexibility, the new MOMENTS™ wood concept is a great choice for kindergartens and schools.

* Pinewood is not available for selected areas of the world with hot and humid climates.

FUTURE-PROOF PLAY POSSIBILITIES

Corocord™ Spacenet™ — the continuation of a proud concept story

A rope playground is the perfect blend of fun and development benefits. This year, we have increased our Spacenets™ flexibility options to enhance customisation and future-proof our rope playground concept. This makes our Spacenets™ the perfect choice for children to explore and grow, but it also enables detailed customisation to your specific needs or concept ideas.

Our brand-new membrane connector enables on-site membrane assembly, giving you a great deal of design freedom when adapting the SpacenetTM structure to the landscape and existing playground features or when designing a site from scratch.

Unlimited flexibility — interlinking options

With six pre-defined colour concepts and numerous add-in and add-on options, you can create bespoke SpacenetsTM structures. A new platform enables interlinking with our other popular product categories, such as MOMENTSTM, ELEMENTSTM and Robinia.

On-site customisation

The membrane connector in high quality steel is in alignment with other Corocord™ parts, enabling great flexibility and on-site customisation.

Reach the target

The yellow target ball at the top enables multiple options for intriguing games, benchmarking and a sense of achievement. The top goal ball is just one of many new add-on options.

Inclusive: sensory play variation on both sides, in two heights

Sensory play in two heights fosters an inclusive environment where children of all ages, abilities and heights can explore and experience, individually or with friends. This makes for a wide and inclusive user experience in parks, housing or educational settings where supporting diverse needs is a priority.

UNFOLD SENSORY PLAY WITH PLAY PANELS

New elevated play panels — making play activities even more welcoming for all

Children develop essential human skills in play as they follow their innate desires: curiosity, creativity and community. With KOMPAN's range of playground play panels, you can enhance play experiences by giving children the opportunity for exploration and individual play, also in small playgrounds. Our activity panels are designed specifically for toddlers, kindergartners and primary school-agers, guiding

them toward key areas of development as they engage in fun, voluntary play. This year's new play panels focus on sensory stimuli and multi-layered challenges. Available in two different heights, our play panels are designed and tested with users to accommodate children of all ages and all abilities, including those who require wheelchairs to move around.

Make-and-trade panel

While engaging in explorative play, children experience cooperation, problem-solving and tactile stimuli, training their fine motor skills and creativity. This sand-and-water play panel inspires explorative, sensory play and often spurs dramatic play scenarios such as playing shop. This stimulates children's communication and language skills, as their imagination takes them everywhere.

Accessible for ages and abilities

To increase the reach of a wide span of age groups and user scenarios, including users with assistive devices or wheelchairs, we have tested and developed two different heights; a low height for the youngest users and a higher play panel for older users or users in wheelchairs.

Turnable maze — a sensory wonder With multi-layered challenges, the turnable maze caters to a large age span. A more complex maze challenge on one side and a more simplified maze on the other offer individual play and group play activities for different skill sets.

Cardio for all

This range invites all types of people and abilities to have a great workout and increase their heart rates — all in the name of creating healthier and happier communities.

Arm Bike — embrace accessibility Featuring a low seat position, wheelchair access, dual-side resistance adjustment and ergonomic handle, the cardio Arm Bike is a compact but effective workout for all abilities.

Smooth resistance selector mechanism

The resistance adjustment handle is integrated into the cover, which is made of vandalism-proof polycarbonate. This allows for easy adjustment and simple mechanics. This design provides ease-of-use and maximum robustness.

Recumbent Bike

The ample space between the cover unit and the seat allows for easy access, and the backrest is easily adjusted when seated. The wide Ecogrip seat and adjustable backrest ensure a steady workout for people of all sizes.

FITNESS ESSENTIALS MADE FOR THE OUTDOORS

High-quality, adjustable cardio equipment for all

Our Essential Cardio range is designed to give users of all ages and abilities the perfect cardiovascular workout. These cardio machines are intuitive and straightforward to use, and resistance can be adjusted just by turning a handle. This means that users of all fitness levels will get a safe and effective workout every

time. The magnetic brake system is low-noise, extremely durable and provides a smooth exercise experience. This cardio range covers all user needs, providing workouts as good as the best indoor ones — or maybe even better!

Super Combis — Supervised

Super Combis with third-party options such as the battle rope, boxing bag and barbell are intended for supervised or gated areas only, as these structures do not satisfy safety standards for public spaces.*

OUTDOOR FITNESS MULTI-STATIONS

Multiple strength exercises all in one

KOMPAN is proud to introduce our new range of functional training stations: Super Combis. In a compact design, the Super Combis offer a large variety of exercises targeting all muscle groups and skill levels. Each Super Combi has a perfect mix of fun, easy-to-use and more challenging items. A great example is the integrated universal parallel bars that encourage creative workouts and are accessible for wheelchair users. Also, we have rings, step platforms and climbing ropes. Items that are

fun to use and can be used by everyone. The Super Combis have multiple configuration options and are designed to maximise functionality in a small footprint. This makes them the ideal solution for schools, public parks and recreational spaces looking to offer diverse and inclusive fitness opportunities.*

^{*} The Super Combi supervised structures are intended for gated areas only as they include items that do not satisfy safety standards for public spaces. Loose items are not included in the Super Combi supervised products.

BE INSPIRED

Browse the following pages to be inspired on how to plan a playground with play activities, intergenerational play, age-appropriate play and play zones.

The amazing, thrilling playscape attracts all ages and abilities with its richly varied, responsive play choice. The varied playground areas support both wild and quiet play types and behaviours, for young as well as older children and tweens.

Several playground zones with break areas invite long stays. KOMPAN's six universal design principles guide a playscape inspiring children of all abilities to play and come back.

The Toddler's Paradise is a safe world of play for toddlers. Shown here in a classic park area, but it would also suit a kindergarten, a courtyard or a public square. The playful themes and colours invite children to play. The play equipment is placed on different sides of the "river" which adds extra play stories.

The variation of play equipment provides multiple ways of playing. The playground makes space for social play, role-play and the opportunity to play alone.

To be an astronaut, one has got to be in great shape. The Space Travel theme calls upon children to come and be physically active spinning on the planets, climbing on the structures and jumping from star to star. The Space Travel playground also inspires conversations about space, the physics of space, gravity etc. As the majority of play takes place at ground level, or close to ground level, children with disabilities can be part of the play.

The many different activities in this design will make this playground an active place to play. Not only can it activate many children at the same time, the many social and physical challenges will also keep them active for a long time.

KOMPAN SITE PLANNER AND PRODUCT CONFIGURATOR

For instant 3D and photorealistic renderings

Creating the perfect playground or fitness site is more than just a project — it's about bringing your vision to life. The KOMPAN Site Planner tool is designed to make this process seamless, collaborative and incredibly efficient.

Imagine being able to see your ideas come to life in real time. Our Site Planner tool can do just that. This powerful tool allows you to sit down with your KOMPAN sales representative and design your playground or fitness site on the spot at your location. The sales representative works closely with you, offering expert advice and recommendations throughout the design process.

Within moments, your concepts are transformed into stunning 3D and photorealistic renderings. This means you can visualise every detail of your project instantly, making adjustments and improvements on the fly. No more waiting for sketches or revisions — your dream project unfolds right before your eyes.

Further, the Product Configurator tool allows you to experiment with different layouts, colours and features of the products placed on the site.

From vibrant playgrounds that spark children's imaginations to dynamic fitness sites that promote health and wellness, our tools make it easy to design spaces that inspire and engage.

Ready to bring your ideas to life? Contact us and let's work together to make your vision a reality.

THEMED PLAY SYSTEMS

MOMENTS™ TOWN

Everyday Adventures

Engaging in play helps children build life skills and is most impactful when it reflects everyday surroundings. Town-themed playground equipment invites children to explore the bustling life of a town, sparking their imaginations with endless play possibilities.

Climbing trees in the park, navigating the miniature town square, going to the café, having ice cream at the ice cream cart, or working as a fireman at the fire station brings real-life adventures to life.

MOMENTS™ COUNTRYSIDE

Harvesting Fun

Play is about preparing for life and is at its most forceful in stimulating youthful imaginations when mimicking reality. Farm-themed playground equipment opens the door to adventures that would otherwise be "off limits".

The thrill of climbing on a giant tractor triggers real-life scenarios on the farm, where the barn is stocked, not with hay, but with stacks of endless fun.

For a greener future

TODDLER MULTIPLAY

Colourful play for toddlers

Playing is how toddlers learn about the world around them. Through play, they practise new skills, explore their imagination and make new friends. Familiar themes create playful conversations, and the elevated playhouses provide a physical climbing challenge with an area underneath for a play

Toddlers can safely explore and find their place in the world playing on a Multiplay structure.

GIANTS

Heights that WOW

The towering GIANTS come at a staggering height of seven or nine metres. A small footprint does not mean fewer play activities - quite the opposite. Filled with physical and cognitive play activities from top to bottom, inside and out, they are designed to WOW and challenge school-aged children.

The thrilling slide and themed exterior add to the excitement as GIANTS entice children to challenge and explore heights that wow!

KOMPAN SHADING SOLUTIONS

Children should only worry about play

When playing outdoors on sunny days, children need protection from the harmful rays of the sun.

A KOMPAN shading solution is an easy and secure way to get just that. The integrated sails provides a large shaded area that slowly moves over the play structure and areas around it. By reducing the intense heat on the hottest of days, the children are safe from sun fatigue and can happily play for longer.

Shade material

Sails are manufactured from Commercial 95 High Density Polyethylene (HDPE), a knitted shade cloth manufactured solely for tensioned sunshade structures.

The material is treated with UV stabilisers to give it a very long life in direct sunlight. KOMPAN shades will not rot or fray, and the high quality lock-stitch construction gives superior tear strength. The shade sails are only constructed from commercial grade knitted shade-cloth with up to 96% UV block.

In light rain, the water will run off to the lowest point, but the water will drain through the fiber in a heavier downpour.

Open integrated shading

Shade solutions consisting of four or six individual sails placed in different layers are available for the large square deck and the Mega Deck platform for Moments[™] and Elements[™] play systems.

Choose between 6 different colours:

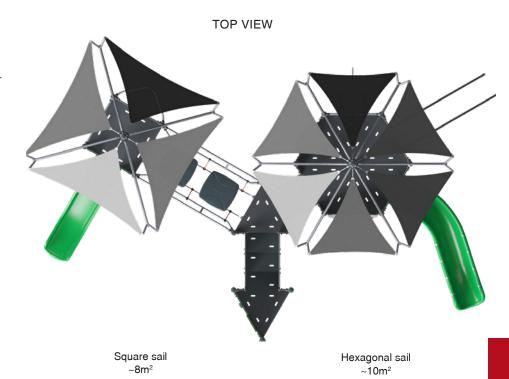

Closed integrated shading

These integrated shades are available for all deck shapes and sizes within Moments $^{\rm TM}$ and Elements $^{\rm TM}$ play systems.

Unique designed easy shade take down system in case of heavy wind forecast.

Choose between 6 different colours:

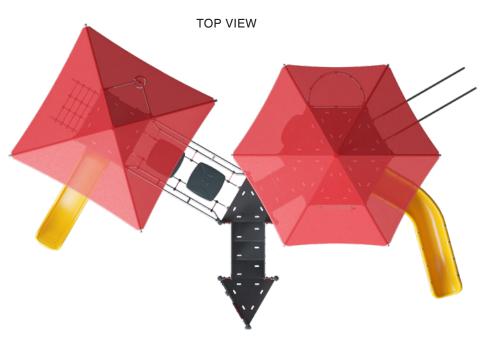

Square sail ~9m²

Hexagonal sail ~11,5m²

SIMPLY PLAY

The Simply Play Towers are modest in design terms, ingenious in concept. Through their flexibility, they offer countless options for play. The clean simplicity of the towers and little porches entices the young users, perhaps because they are teasingly accessible. The climbs are short and sweet, but there's a thrill in getting up to see the world from the height of an adult.

SIMPLY PLAY TOWERS

Simple design — lots of play value

The Simply Play Towers are straightforward play structures with lots of play value and flexibility. The Simply Play Towers can be customised to match your users' needs: Bridges, tunnels, climbing nets, steel slides or play panels are just some of your options.

Children are drawn to the vibrant colours and simply love these play structures; you will love them for their flexibility.

See options on FLEXIBILITY page.

ELEMENTS™ TODDLER

Responsive play for the youngest

Physical play is essential in scaffolding child development. The ELEMENTSTM TODDLER series provides a safe world of play activities for the youngest. Responsive play activities stimulate the child's motor skills and gently push toddlers to explore and learn through play.

Playing on the ELEMENTS™ TODDLER series helps toddlers develop skills to prepare them for kindergarten, school and life.

ELEMENTS™ GROW

Agile and exploratory play

ELEMENTS™ GROW is a world of agile and exploratory play activities that enhance children's holistic development. Playing on these structures, children face age-appropriate physical challenges that gently push their boundaries and help them grow.

The physical challenges develop the child's motor skills, helping the child become self-confident when playing with friends and exploring the world.

ELEMENTS™ GO

Free play - No instructions

ELEMENTS™ GO is a series inspired by children and their innovative and creative approach to play. Observing how they climb on the exterior surfaces of regular post-and-platform playgrounds in search of new challenges inspired us to create structures to enhance this curiosity.

Children are inherently curious and masters of innovation. Thankfully, playgrounds don't come with play instructions.

GALAXYTM

In-between playground

We know that teens and tweens like to play and hang out in playgrounds. Therefore, we developed a series of equipment for older children as a crossover between playgrounds and fitness sites.

GALAXY™ was the world's first solution to move away from the traditional post-and-platform and play-tower designs. It also became the first free-play design to include all children regardless of abilities.

See options on FLEXIBILITY page.

BLOQXTM

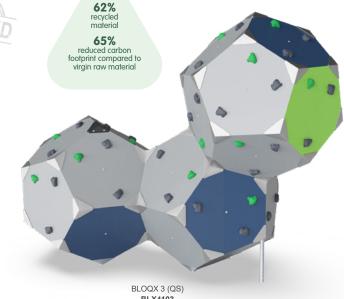

A cool, simple, scalable system

BLOQX[™] offers a unique and intense climbing experience. Sometimes exhausting - even for a tween or a teen! That's why the design accommodates rewarding hang-out spots on the upper surface of the pentagon shapes.

The BLOQX™ design is a favoured selfie platform, which tells us that BLOQX™ has made its mark with the target group, tweens and teenagers. That's pretty cool.

FREESTANDING PLAY EQUIPMENT

SPINNERS & CAROUSELS

Spinning with joy

Children need the dizzying input that comes from spinning. These important movement experiences help the child's nervous system mature and organise. Besides being great fun, the spinners and carousels also help children train their sense of balance.

Our innovative spinners and carousels attract children of all ages and abilities, and the best part is: They love it!

SPRINGERS

KOMPAN invented a new way of rocking, and we have been rocking the world since 1970

This is where it all began: A red hen on a bright blue spring. The Crazy Hen was the world's first play design to deliver a fun and more functional alternative to the traditional seesaw. Today, the iconic shape is recognisable worldwide.

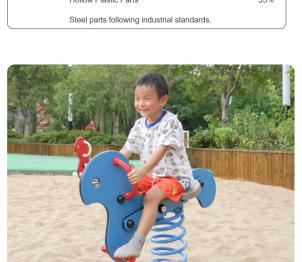

Every playground springer is just waiting for a child to unlock their creative potential. And you don't need a friend - or a counterweight - to get rocking!

For a greener future

SEESAWS

The fun thrill of rocking

Seesaws add a social dimension to the joy of rocking. Rocking on a seesaw trains children's muscles, motor skills, balance and coordination. The spacious design and sturdy back and foot supports allow children of all abilities to play together.

The fun thrill of rocking will make children return for more. There is nothing better than rocking with a friend - or two!

SLIDES

Speed, thrill and loss of gravity

No matter their age, children love a good slide! When visiting a playground, the slide is often the activity children run to first. Sliding trains the child's sense of balance and spatial awareness, something that essential for, e.g., safely managing traffic.

Stand-alone slides offer numerous play activities. Whether the children use the slide or play hide-and-seek underneath it, imagination is the only limit.

Steel slides heated by the midday sun can potentially cause skin burns. We recommend pointing steel slides away from the midday sun, or to use PE slides or shading.

EMBANKMENT SLIDES & ROPES

Slide, climb, repeat!

Enjoy the fun of an embankment slide as you share the thrills with your friends, zoom down the same hill, and climb back up. Hill Climbers perfectly supplement embankment slides: available in different lengths, you can find the perfect fit for your hill slopes, whether a gentle 20° or a more daring 60°.

Start cheering, and let the sliding, climbing, fun and belly-laughing begin!

SAND & WATER PLAY

A vital part of a child's creative and cognitive development

Playing with sand and water has a substantial developmental impact on a child. Constructing things in the sand, for instance, gives the child a sense of success and stimulates the child's creativity. Sand and water stations also encourage children to play together.

Our sand and water stations come in many shapes and sizes with an appealing look that awakens the curiosity in children.

PLAYHOUSES & THEMED PLAY

Familiar, child-sized spaces in a big world

With their child-scale sizes, our open playhouses are a strong play motivator for the youngest. The open ends and walls widen the play space, allowing many children to play together from the inside and the outside. It's the first stage of forming a community.

From the Villa to the Allotment, themed playground playhouses open doors to understanding the value of friendship and imaginative play.

TODDLER EQUIPMENT

A stimulated toddler is a happy toddler

The happiest toddlers are those who experience age-appropriate stimulation and challenges. The playful designs in our Toddler Equipment range draw on familiar connotations and invite children to engage in dramatic, developmental play.

Whether climbing the tallest giraffe or driving a pretend car, our toddler universe gently stimulates and guides the little ones to understand the world around them.

TODDLER STATIONS

Themed play stations for play and learning

Toddler stations interpret real-life environments and appeal to infant and toddler curiosity: lots of details to explore and play at eye level. Play panels stimulate their creative and cognitive skills and the opportunity to play from all sides.

The toddler stations are placed on top of the surface without fixation in the ground, making it a movable flexible solution for indoor or outdoor use.

PLAY PANELS

That little extra for fun, play and learning

In free play, children learn by following their instinct to play, developing fundamental human skills. Adding play panels to your playground structure creates a learning dimension to the play experience. Through music and themed play panels, children learn about different topics.

And yes, adults can join the play and guide the children to learn new things while having fun, too.

JUMPERS

Jumping fun

Children are attracted to the Jumpers' immediate response, and bouncing on Jumpers is one of the most popular activities in the playground.

Choose between circular or square Jumpers to create a great spot for jumping fun.

Jumper Square, 100x100cm **JUM101**

Jumper Round, Ø112cm JUM102

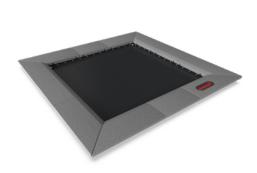

Jumper Six-sided, 108x108x108cm **JUM103**

Product number	Product name	Ġ	Age / Key user group	Capacity	Fall height	Total height	Fall space dimensions	Installation	Total CO₂e
		(years)	(users)	(cm)	(cm)	(cm x cm)	(hours)	(kg CO₂e)	
JUM101	Jumper Square, 100x100cm		4+ / 4-15	1	100	3	400 x 400	3	410
JUM102	Jumper Round, Ø112cm		4+ / 4-15	1	100	3	413 x 413	2.8	380
JUM103	Jumper Six-sided, 108x108x108cm		4+ / 4-15	1	100	3	408 x 412	2.7	371

Inclined tiles support inclusive play, allowing non-motorised wheelchairs to enter and exit the Jumpers with assistance.

Jumper Square, 150x150cm JUM104

Jumper Rectangular, 100x300cm **JUM105**

PRODUCT INFORMATION

BALANCING & CLIMBING

So basic, yet so important

A somersault bar, stepping pod or climbing net may not look like much. But through fun play, they contribute to child development. Rotating trains the child's sense of space, climbing trains the child's cross-coordination skills, and jumping trains the child's agility and balance.

All these motor skills are vital to navigating the world confidently, for instance, when judging distances in traffic.

CABLEWAYS

The king of fun, thrill and action

The queue for the cableway is always long! Whether you're four or twelve, the cableway is just great fun. Besides being fun, the cableway teaches children several important lessons and skills. They learn to wait their turn and hand over the seat to the next in line.

All across schools and parks, one look at all the children lined up for playground cableways, and you can understand why. What a ride!

MEETING POINTS & ACCESSORIES

Comfortable hang-out spots

As children grow older, they become more and more interested in social play and social interaction, and comfortable meeting points should be available in any school playground. Our Meeting Points solutions cater to small or big, impromptu social gatherings and a place to relax.

Meeting Points are comfortable hang-out spots for a chat or a break, whether on the swaying hammock or the bench.

SIGNS

Customisable signage

Signs are an essential way to make relevant information available for the users of private or public areas. E.g. general or practical information or instructions about the use of a playground, opening hours, ideal user/age groups, sponsors or contact information.

Our customisable signage concept is flexible regarding text, signs and symbols, enabling you to get the right message across.

CLASSIC SWINGS

The classic swing that never grows old

To swing is a classic play activity, as is the design of KOMPAN's classic swings. The traditional look makes it the preferred design in many playground settings. You can construct your swing solution from our wide range of swing seats with as many sections as possible.

The standard swing and baby seats can include antiwrap clamps to prevent the chains from turning.

See options on FLEXIBILITY page.

PORTAL SWINGS

Swings children keep coming back to

Of all play activities, swinging is a favourite. Apart from being great fun, swinging trains children's agility, balance, coordination and spatial awareness. These motor skills are crucial to judging distances and navigating traffic safely.

Whether it's for a quiet moment alone or swinging with a group of friends, children love to swing.

See options on FLEXIBILITY page.

SWING SEATS

A swing for every need and ability

We want everyone to enjoy the thrill of swinging. Our wide range of swings caters to various abilities and age groups. We offer everything from a baby swing seat to a five-way swing solution and an inclusive swing seat.

The Rope Nest Seat is popular with tweens, and the You & Me swing seat is perfect for sharing the swinging experience with caregivers.

Seats are available for other swing heights.

For a greener future

UNIQUE SWINGS

Swinging together — the more, the merrier!

Not only is swinging the most popular activity for playful children, but swinging together is an irresistible invitation for all children to play - and simultaneously train vital skills. The social-emotional effect of swinging together cannot be overestimated.

The soothing or wild swing movements create a joyous thrill, laughter, or relaxation, whether swinging together or alone.

COROCORDTM ROPE PLAYGROUNDS

COROCORD™ SKY PLAY

Reach for the stars

A Sky Play structure is an entire playground in one play structure. At the top of the structures, the adventurous sky cabins await. The route to the sky cabin goes through an imposing climbing net where children can climb to safety and experience a sense of achievement.

Unleash your inner explorer and embark on a journey that'll have you reaching for the stars - literally!

COROCORD™ PLAY TOWERS

Play your way to the top

Corocord Play Towers offer a variety of ways to get to the top. Each level offers a new colourful world of play, and children can pave their way in a manner suitable for their age and abilities. The net structures challenge the children's cross-coordination skills and physical strength.

Moving upward, new climbing challenges arise and boost confidence. Talk about an elevated experience!

COROCORD™ LOOPS

Eye-catching pieces of play structure art

Loop sculptures draw everyone's attention with their fascinating shapes and bright colours. These eye-catchers hold multiple loop play activities. While children slide, climb, balance, crawl, jump or dangle, they practise essential skills in child development.

Corocord Loop structures are here to make playtime extraordinary, one thrilling adventure at a time!

COROCORD™ DYNAMICS

Exploring fundamental forces

Rotating, swinging, bouncing: Hardly any child can resist the magnetic attraction of these dynamic products. The play structures deliver high-quality fun, drawing on the fundamental gravitational forces, while powerful movement experiences help the child's nervous system mature and organise.

Let the gravitational forces take you for a spin, and enjoy a thrilling ride and giggles echoing for miles.

COROCORD™ MINI DOMES

Crawl and climb for the little ones

This Mini Dome is a wondrous climb-and-crawl structure for little explorers. With pleasant rest points for socialising, gently bouncing climbs and intriguing play panels, this small structure is big on play value for two- to five-year-olds.

Children can crawl to the top or play peek-a-boo at ground level beneath the structure. The abacus and mirror play panel ensure hours of exploration and play.

- ✓ Unlimited flexibility interlinking options

COROCORDTM SPACENETTM

Three-dimensional and sky-high play activities

Very few play spaces incite children to move around in all directions as Spacenet does. This sky-high play space sparks their imagination as they venture into a thrilling three-dimensional universe. A Corocord Spacenet is superior for developing a child's cross-coordination and physical skills.

With a Spacenet, the horizon knows no limits, and the joy of exploration knows no bounds. $\,$

COROCORD™ MONKEY TRAILS MINI

Trailblazing play for the youngest

Prepare to witness joyful chuckles as children climb, swing and balance their way through play spaces above and below. With age-appropriate challenges for the two- to six-year-olds, the Monkey Trails Mini will continue to grow on children as it holds play activities for the entire age span.

Together or alone, and for many abilities, the Monkey Trails Mini has thrilling play activities for all.

COROCORD™ MONKEY TRAILS

Get in Motion!

No other play equipment offers so many different opportunities to get in motion and use mind and body skills as the Corocord Monkey Trails do: balancing, bouncing, climbing, spinning and sliding. The children have to navigate and find ways through the complex rope-and-activity jungle.

Brace yourselves for a wild climb of endless possibilities to get body and mind in motion like never before.

COROCORD™ EARLY CLIMBING

Fun for the little climbers

Climbing is fun and an important skill for a child to master, especially in the younger years. When climbing, the child develops cross-coordination skills, stimulating the two hemispheres of the child's brain and ultimately helping the child learn to read.

Get on the climbing path! Even young, more insecure climbers can get a fun, developmental experience.

COROCORD™ PLAY BRIDGES

Bridging the gap between play and imagination

Imagine the sheer bravery it takes to keep stepping forward, suspended high in the air, peering down at the ground below. That's just thrilling! A trip across the bridge boosts the child's self-confidence and trains the child's spatial awareness.

Take the obvious route across the bridge, or explore an entire world of fun above and below, just waiting to be discovered.

COROCORD™ FRAME NETS

Enter the realm of three-dimensional play

Frame Nets are gateways to a vibrant three-dimensional playground where kids rule the domain of fun and exploration. As children climb from one rope to another, a symphony of coordination unfolds their cross-coordination skills and enhances physical strength.

With every twist and turn, young minds ignite with the power of logic and problem-solving while unravelling mysteries on the way to the top.

NATURE PLAY

ROBINIA FANTASY

Escape to the forest of fantasy

In the enchanting realm of the fantasy universe, imagination and play intertwine. The quirky expression of the Robinia Fantasy play structures is unique and on nature's terms. The signature posts have their authentic wood grain pattern from when they were forested in their natural state.

Climb towards the eternal battle between good and evil - or swing to escape the Warlock's magic spell.

See options on FLEXIBILITY page.

Please note that each Robinia Fantasy structure will have its own unique appearance. Shaped by nature, natural variations will occur.

For a greener future Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA VILLAGE

It takes a village

The Robinia product portfolio is a collection of organic play structures with something for everyone: from enchanting playhouses designed for the youngest to large play structures for the oldest.

Robinia structures add a natural look to suburban landscapes or infuse an organic touch into bustling cityscapes. Whether you want your playground to stand out or blend in, Robinia is your answer.

See options on FLEXIBILITY page.

For a greener future

Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

FLEXIBILITY

With multiple colours and configurable options we offer lots of flexibility to our standard available products.

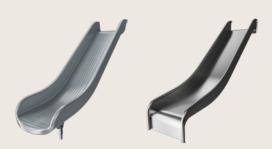

OPTIONS

Slides and egresses

NOTE: Steel slides heated by the midday sun can potentially cause skin burns. We recommend pointing steel slides away from the midday sun, or using PE slides or shading.

Extension and link

Classic and organically shaped roofs

Tall climbing wall and staircase

More flexibility

Contact us for more information on the extended range of options for configurable playground equipment. Please note that prices and delivery terms depend on specified configurations.

ROBINIA PLAYHOUSES

A cosy play space for the youngest

House-themed playground equipment offers a sense of familiarity and comfort for the youngest. Combining the "house" concept and the incorporation of nature ignites their imagination and inspires hours of play.

In other words, Robinia Playhouses blend the benefits children get from exploring familiar concepts like "house" or "home" through play with the wonders of nature.

For a greener future Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA CASTLES

Captivating castle-themed play

A Robinia castle-themed play structure has creative play activities on all levels and floors. Its impressive size entices children of all ages to strategise how to defend or conquer the castle, helping them develop social and cognitive creative skills.

Prepare for action and adventures suitable for queens and kings, and start making your way to the castle tower.

For a greener future

Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA SHIPS

A treasure trove for playful children

Pirate-themed Robinia ships are packed with adventure-creating activities that inspire children to play and explore for hours. Themed play entices children's imaginations and encourage role-play, which builds confidence in children - imagine achieving a team goal when victory prevails.

If pirates have conquered your playground, it's time to get everybody on deck to guard the treasure!

For a greener future Robinia wood:

ROBINIA THEMED PLAY

Full speed on imagination

Play is about preparing for life. Themed play is most forceful in stimulating youthful imaginations when mimicking reality. Themed playground equipment opens the door to adventures that would otherwise be "off limits".

The thrill of flying the Propeller Plane or driving the Unitruck prompts real-life scenarios, where the imagination of going from one place to another brings endless fun.

ROBINIA PLAY SYSTEMS

Simple structure, lots of play

The concept of Robinia Play Systems draws on the idea of creating lots of play activities within a simple play structure. The characteristic three wooden post structures provide many challenging physical activities for children of all ages.

The many varied activities - climbing, sliding, balancing, spinning - keep children active for hours. And they'll want to come back for more.

For a greener future Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA CLIMBING TRAILS

Climbing Challenge - Bring it on!

A Robinia climbing trail is a challenge that children of all ages and abilities will want to take on. Whether playing "the ground is lava" or another creative game, children train their balance and social-emotional skills and practice essential life skills without noticing.

Balancing, swaying and climb-and-crawl activities are immense fun, and the challenge is accepted!

ROBINIA SPRINGERS & SEESAWS

Nothing beats rocking

A mother's gentle rocking is a soothing feeling. As children grow, rocking becomes a fun feeling. Rocking trains a child's sense of balance and spatial awareness - senses that help the child concentrate and navigate safely in traffic.

For younger children, rocking through their own effort or with a friend is the best. Find your favourite bug-themed springer or seesaw and start

For a greener future Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA SPINNERS, CAROUSELS & SLIDES

Vital tummy-tickling play activities

The Robinia Dynamics portfolio entices children of all ages and abilities to come and experience the thrilling feeling of sliding, spinning or swinging. Children need tummy-tickling input from spinning, sliding and swinging to help their nervous system mature and organise.

Spinning, sliding and swinging are vital in child development - and the best part is that children love it!

For a greener future Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA CABLEWAYS

The king of fun, thrill and action

The queue for the cableway is always long! Whether you're four or twelve, cableways are the best fun. Cableways teach children several essential skills. Through interaction with each other when playing on the cableway, they learn to wait their turn and hand over the seat to the next in line.

A cableway is a thrilling playground asset that unites generations, abilities and playful minds alike.

For a greener future Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA BALANCING

Down-to-earth learning

Once children embark on a balancing trail, they develop essential life skills without noticing. Balancing helps train their eyesight and ability to concentrate. Two fundamental skills that both improve children's readiness for school and performance when going to school.

Watch out for crocodiles in the lagoon or get ready for a thrilling game of "the ground is lava".

For a greener future

ROBINIA CLIMBING

Challenging climbing structures

Remember the sense of achievement when conquering the giant tree in your neighbourhood? Robinia climbing structures create that same wonderful experience! Paving their way to the top, children build self-confidence and develop fine cross-coordination skills that help them learn to read.

Children love to climb trees. Not because it is easy but because it is challenging.

For a greener future Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA PLAY, ACT AND LEARN

Add new dimensions to play

The Robinia Play, Act & Learn range offers sensory, ground-based creative play for the youngest children. As an ultimate play starter, this range takes children through a creative play world with activities stimulating their cognitive and social skills.

Whether on the stage, drawing on the chalkboard or playing on the music panels, the rhythm of play resonates with joy.

For a greener future Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA PLAY PANELS

That little extra for fun, play and learning

Play panels for the youngest add a learning dimension to play as the panels help guide the child's learning towards specific topics. Children learn by drawing on the chalkboards or playing together on the music panels.

Watch them blossom as their skill set grows when participating in creative play with friends, caregivers or independently.

For a greener future

Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA SAND & WATER PLAY

Sensory, fun and messy play

We all know the sensory feeling of sand running through our fingers. Why? Because we've done it so many times as children. Constructing things in the sand gives children a sense of success. It stimulates their creativity while learning to take turns and observe how their peers unfold their creativity.

Messy but so much fun. So kids, pull up your sleeves and start mixing sand and water.

For a greener future Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

ROBINIA SWINGS

Swinging - a natural joy

Of all play activities, swinging is a favourite. Swinging trains children's balance and coordination as well as their spatial awareness. These motor skills are crucial for judging distances, navigating traffic safely and sitting still in school. And children love to swing.

Whether it's a quiet moment swinging alone or wild play with friends on the Bird's Nest swing, swinging is the best feeling.

See options on FLEXIBILITY page.

ROBINIA SUNSHADES & ACCESSORIES

Adding basic value

It's no secret that when playing outdoors in sunny areas, children need protection from the sun. The range of Robinia sunshades provides shade in parts of the playground or the entire play area, allowing children to engage for hours of outdoor play in even the sunniest areas of the world.

It's a brilliant way of ensuring the usability of your playground all year round.

For a greener future

Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

When visiting a park or a public area, being able to sit down for a rest or to eat and drink is crucial to the park experience. KOMPAN's furniture in Robinia wood blends nicely into any outdoor area. The calm wooden look blends into green areas such as parks and helps bring the gentle touch of nature to urban areas.

With the KOMPAN signage concept, it's possible to create customisable signs for all kinds of outdoor activity areas. For flexibility and more information, see pages 184-185.

OUTDOOR FITNESS

SUPER GYM M

SOL202501

The Super Gym M package combines the very compact Super Combi 1 with an sit up bench, a lower back bench, a Cross Trainer, and abike. Both pieces of cardio come with adjustable resistance. Regardless of skill level, everybody can easily get an all-round workout on this site.

SUPER GYM XL SUPERVISED

SOL202901

The Super Gym XL Supervised has the same great features as the standard Super Gym XL but also includes a barbell rack, a boxing back connector, and a battle rope connector. This package is intended only for supervised or gated areas such as sports or fitness clubs, as some of the included items do not satisfy safety standards for public places.

Minor regional deviations can occur due to differences in safety standards

SUPER GYM L

SOL202701

The Super Gym L is based on the Super Combi 3, which provides 360-degree activities in a square structure. It has a built-in challenge where you can move from the overhead ladder through the Turbo wheels and end in the snake bar. In addition to this, it has a low bar, incline press, target shoot, climbing ropes, rings, and jumping platforms. It is a very engaging outdoor gym with a compact footprint compared to the number of included activities. It can be used for school PE classes, group training, and many other types of structured workouts.

QUICK FITNESS M

SOL202101

On the Road to Being Active. This is a compact fitness site ideal for truck stops or similar. It has all the things you need to compensate for long hours behind the wheel; cardio, abs, lower back and plenty of strength and stretching opportunities. This site easily fits into small locations near highway parking.

CIRCUIT 6

SOL200501

High-quality Training in a Small Circle. This space-efficient circuit training area with high-end cardio and strength equipment makes training attractive to a broad user group and those not already fit. The site is perfect for small communities and parks. Circuit training is both effective and very popular, so a site like this will greatly benefit any small community or park.

ACTIVE AGERS S

SOL200101

Accessible fitness for seniors. The package Active Agers S is a compact solution perfect for senior citizens. Equipped with cardio machines and Stay Fit equipment designed to prevent falls and improve balance and mobility, this site is ideal for senior living communities and health centres.

CIRCUIT 10

SOL200301

Take your Indoor Circuit Outdoors. Circuit 10 is a compact and efficient circuit training area with cardio and strength equipment. This outdoor circuit includes some of the most popular indoor cardio and strength machines; the timer makes it perfect for interval training. The site is ideal for communities and parks.

ACTIVE AGERS XL

SOL200201

The best you can do for senior citizens. The Active Agers XL site is the perfect space for senior citizens. It has cardio machines and Stay Fit equipment designe to prevent falls and improve balance and mobility. Furthermore, the site has strength machines perfect for maintaining muscle mass. The site is fitted within a circular walking path and is ideal for senior living communities.

COMMUNITY S

SOL200601

Cardio Attracts More People. The compact Community S is the perfect space for youth and training in small groups. Its different street workout and cardio equipment make it optimal for bodyweight exercises, such as pull-ups and push-ups, and cardio training. The small space is great for housing, city spaces and parks.

COMMUNITY L

SOL200801

A very Attractive Space. The Community L is the perfect place for medium-sized group training. It is filled with different equipment, from Street Workout to Cross Training and Cardio equipment. It is the optimal space for bodyweight exercises, such as pull-ups, push-ups, and an added focus on lower back exercises and cardio training. The site fits perfectly into housing areas, city spaces, and parks.

COMMUNITY M PREMIUM

SOL201301

The best from indoors now outdoors. This site is a high-end outdoor replacement for the traditional indoor fitness centre. The site includes a cross-trainer and bike with adjustable resistance. Strength training for the whole body plus steps and functional training. All in a beautiful and compact setting.

COMMUNITY L PREMIUM

SOL200901

Simply the Best Site. This is a great example of an indoor fitness center re-created outdoors. You have KOMPAN's innovative strength training equipment and cardio equipment combined with various items for functional training. The highly popular Suspension Trainer and Magnetic Bells make the site appealing even seen from far away. This compact fitness area only needs the space of half a basket court and accommodates beginners just as much as the very fit.

COMMUNITY XL

SOL201101

Impressive Design with Lots of Fun. A site with a strong focus on fun and functional training. The many exercise options in the Cross Training frames make training effective and engaging. The obstacle course provides a perfect blend of cardio, agility, and excitement: A very motivating space for group training and social exercise.

INCLUSIVE XL

SOL201501

The Most Inclusive Outdoor Fitness Site. The Inclusive XL is a gold-standard example of how inclusive outdoor fitness can be realised. This site offers opportunities for everyone, regardless of skills or disabilities. There are lots of spots for people using wheelchairs, people with poor eyesight, or people with poor balance and walking capabilities. The keywords here are diversity, adjustable resistance, supporting rails, and friendly design with simple, intuitive use of equipment.

INCLUSIVE L

SOL201401

Invite People with Disabilities. Inclusiveness is about having something for everybody. On this site, every second exercise station is directly usable from a wheelchair position. This means that people dependent on a mobility device can train together with able-bodied persons - either as individual or group-based circuit training.

STREET M

SOL201901

When Bodyweight Exercises become Fun. Street M is a compact fitness site with over 70 fun and effective bodyweight exercises. The lower back and sit-up bench provide safe and controlled core training. This site also contains many variations for an upper body workout; even pull-ups don't need to be hard when using the pull-up station or the parallel bars, which are also perfect for stretching exercises. Do your leg training on the two-step benches for strength or cardio training.

OBSTACLE COURSE S

SOL201601

Just Follow the Track. This site is a compact obstacle course that, despite its size, still has a lot of engaging challenges. It involves crawling, jumping, swinging, climbing and running, and each obstacle allows individual callisthenics training. This site is the perfect choice for schools and sports clubs.

WOODS

SOL202301

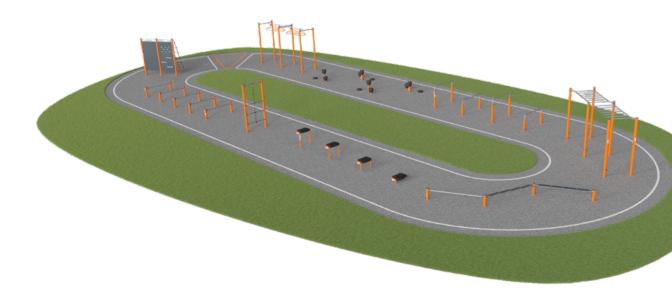

Close To Nature. Wooden fitness equipment made from Robinia is becoming increasingly popular. With the parallel bars and the combi 2 item, more than 40 exercises are available on this site, and a balance beam is always a magnet to anyone - young or old. This site fits in beautifully with natural or urban surroundings.

OBSTACLE COURSE M

SOL201701

Three Rounds and you are done. An obstacle course long enough to make each round a training session in itself. It has eight challenging obstacles that can also be used as exercise stations individually. At this course, you can run, jump, crawl, and climb your way through. This site is perfect for schools, sports clubs, universities, and the military.

WOOD M

SOL202201

More than 70 excercises. With the Wood M, you have many opportunities for bodyweight exercises with an emphasis on easy and challenging alternatives. The low pull-up bars and the push-up bars at differing heights are examples of easy starting points. There is no limit to what you can do on this compact and versatile outdoor fitness site if you are already fit. And the obvious characteristic of this site: all items are based on durable and sustainable wooden Robinia structures.

FITNESS PRO

Discover the pinnacle of outdoor fitness with our award-winning product line Fitness PRO. Created to the highest possible standards, combining beautiful aesthetics with human-friendly design. The PRO line intrigues any park or recreational space and draws you in.

PRO CARDIO

Adjustable interactive workout

The striking Cardio range has been awarded the Good Design Award for its innovative and high-quality design. Our Cardio bikes have adjustable resistance and are geometrically tailored to specific workout needs.

The Arm Bike is wheelchair-accessible, and the Cross Trainer has an innovative sprint mode for shaping thighs and buttocks. All machines are on par with the best indoor machines!

PRO STRENGTH

Full body workout with adjustable equipment

The Strength range is a high-quality replication of an indoor exercise setup. These machines use the same biomechanics and resistance mechanisms as indoor selectorised strength machines. And they are changing the game of outdoor fitness!

The machines are safe, easy to use and very time-efficient because of the controlled movements and the quick and straightforward resistance selection.

PRO CROSS TRAINING

Scalable functional training in a striking design

Our Cross Training range draws attention from afar with its dynamic, modern look. The open-frame structures provide innovative fitness equipment: suspension trainers, pull-up bars, free weights, parallel bars and scalability of resistance.

The Cross Training range is not only appreciated by fitness enthusiasts: In 2017, the range won the Good Design Award and the European Product Design Award.

OBSTACLE COURSES

Challenging All

Obstacle courses are just a great way to exercise. Smart step-ups and extra grips make it easy for beginners to conquer the course, and due to the equipment size and height, even the most advanced athletes will find a way to challenge themselves!

Our obstacle courses are designed to challenge everyone at their own level. Enjoy the moment when you achieve your new personal best!

MOBILITY

Balance, strength and mobility

The Mobility range comprises equipment that improves balance, strength and mobility. Suitable for older people for fall prevention and balance training and beneficial for those recovering from moderate or severe injuries.

Functional and flexible equipment with a focus on strength and coordination is also available for people in general who want to train their mobility.

For a greener future

FITNESS WOOD

The Fitness Wood product line is a smaller wooden range made from robinia. This range combines flexibility and multifunctionality with a lower carbon footprint. Enjoy the same high functionality as the Essentials range while enhancing your park or recreational area with adaptable and cost-effective fitness solutions.

STREET WORKOUT WOOD

Street workout in a natural style

Our Street Workout range is also available in Robinia wood. Perfect for bringing the urban street workout trend into a natural environment or bringing the natural environment into an urban setting.

Robinia wood is a solid material with very high levels of natural oils. Therefore, Robinia wood is the most suitable material for an outdoor fitness solution: long-lasting and close to maintenance-free.

For a greener future

Robinia wood:

Nature's own material harvested from European forestry. Robinia wood is known for its natural preservatives that make it long-lasting in the outdoors.

MULTISPORT

MUGA SOLUTION

In a corner of the local park, this exciting sports area is perfect for kids, teens and adults alike. It's a place where fun and ball games run wild and energy knows no bounds. The goals and courts invite children to engage in thrilling football and basketball matches, while the unique baskets add a fun twist to their playtime.

This dynamic space not only promotes physical activity but also fosters friendships and teamwork. It's a spot where kids can laugh, play and grow together, making it an invaluable asset to the local community's lively spirit.

Let's play

MUGA SOLUTION

This schoolyard has been transformed into a hub of activity and fitness with an exciting sports area! The space offers a perfect blend of team sports and individual workouts, encouraging everyone to stay active and healthy. The multi-use game area is ideal for fostering team spirit and friendly competition, while the street workout equipment challenges physical limits.

This dynamic environment not only promotes physical well-being but also enhances social skills and resilience. It's a place where school pupils can unwind, build friendships and develop a passion for being active, making it an invaluable addition to any school.

MULTI USE GAMES AREAS

Multi-activities - the ball's in your court

The MUGA is to sport what a convenience store is to shopping. It provides an optimised arena, a focal point for activity and a place specifically designed to satisfy a need. These compact stadiums are an essential social asset to create a healthy and engaging community.

MUGAs are where rules are not set in stone but most certainly agreed upon. The only common rule is to have lots of fun.

COSMOS MULTI SPORT

A Player-friendly experience

Cosmos offers a variety of sporting activities. A basketball hoop at the correct NBA height hovers temptingly, and goals invite a game of football or handball. Kick-about games are great for social interaction, competitive yet fostering friendships and promoting active and healthy lifestyles.

Like the rest of the Multi Sport range, the Cosmos invites passing children to stop and ask, 'Can I join?'

AGORA™ PICNIC

Inclusive design as standard

Agora™ Picnic is a flexible, freestanding furniture set for ten people. The bench and tabletop are made of high-quality ash wood and HPL (high-pressure laminate) or perforated steel. The steel frame is galvanised and optionally powder-coated.

Keeping the sides open makes it easy for wheelchair users to approach the table and be comfortably seated. The picnic table is available in two different sizes.

For a greener future Post consumer recycled material: Steel parts following industrial standards.

RUMBATM

Contemporary designs for all environments

A curvy yet square shape gives the RUMBA range its contemporary, modern look. A high-quality ash wood aesthetic ensures this range blends beautifully with the surroundings. The ability to create rounded or straight configurations inspirit a high level of flexibility.

The low-maintenance RUMBA range will help bring your community together and promote outdoor activity or moments of relaxation.

For a greener future Post consumer recycled material: Steel parts following industrial standards.

ANITATM

Classic, low-maintenance park furniture

Park furniture is an indispensable part of public spaces and has been vital in bringing communities together for years. The Anita range invites citizens to engage with their community and enjoy the natural surroundings.

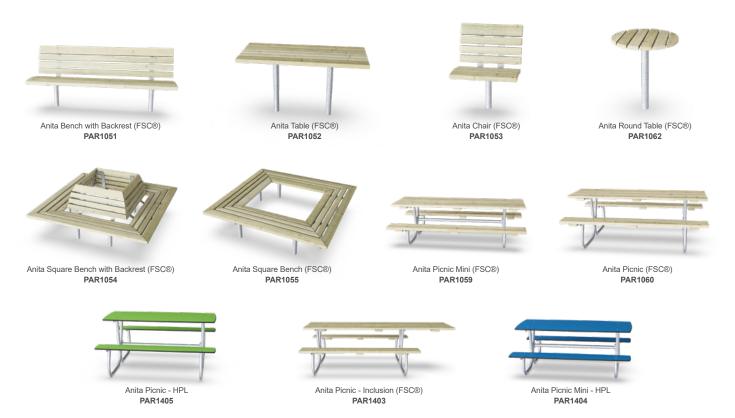

With its classic wooden aesthetic, the Anita range looks great along promenades and in town squares, shopping centres and building entrances.

Pine wood is not suited for tropical areas.

For a greener future Post consumer recycled material: Steel parts following industrial standards.

More flexibility

Contact us for more information on the extended range of options for configurable outdoor furniture. Please note that prices and delivery terms depend on specified configurations.

Emphasise the architectural expression of the area with surfacing available in 29 basic colours and several blends.

Created for outdoor fitness
Leveraging the surface to apply patterns for outdoor fitness significantly maximises the training potential by offering more exercise opportunities.

Rubber graphics

More than 400 prefabricated rubber graphics in 2D and 3D are available to implement directly onto the surface. They can emphasise the design theme and increase both play value and learning.

FUNCTIONAL SURFACING WITH FLEXOTOP™ ECO

The choice of creative designers

FLEXOTOP™ ECO is high-quality wetpour surfacing from KOMPAN. From a safety perspective, this surfacing provides brilliant shock absorption thanks to its two-layer design. Functionality and quality is ensured through TÜV certification according to EN1177 and BS 7188.

With FLEXOTOP™ ECO, designers can be very playful, and the children love it. Different colours, shapes and graphics can support and highlight the overall design theme and

also extend play from the equipment into the surface. The soft, yet firm surfacing is highly inclusive, making it possible for wheelchair users to easily access the playground.

From an operational point of view, FLEXOTOP™ ECO provides a clean and comfortable surface with very low maintenance costs.
