What is roots ok ?

- Formulated & fermented by biotechnology process with humic extract, seaweed extract, amino acid, aloe extract, macronutrients, vitamins, enzymes.
- Strengthen plant ability to anti-cold and anti-drought.
- Enhance plants natural resistance against disease and pest.

What is Ingredients ?

Contains N - 5%, P₂O₅ - 2%, K₂O - 5%, Amino acid - 10.%, humic acid - 10%, organic matterd - 15%, calcium, magnesium, iron, zinc, manganese, boron, molybdate

Functions in the plants & soil

- Helps break up clay and compacted soils.
- Buffers and releases salts.
- Increase root respiration and root formation.
- Unlocks and chelates major and micro nutrients.
- improve nutrients uptake.
- Increase fertilizer retention.
- Reduces fertilizer and pesticide requirements.
- Stimulate beneficial microbial activity.
- Reduce the availability of toxic substances in soils.

Application

- ▶ Soil irrigation : 500cc / 667 square meter with 1000 liters of water.
- ▶ Interval : every 3 - 4 weeks of growth stages.
